Compass of Society rethinks the French route to a conception of 'commercial society' in the seventeenth and eighteenth centuries. Henry C. Clark finds that the development of market liberalism, far from being a narrow and abstract ideological episode, was part of a broad-gauged attempt to address a number of perceived problems generic to Europe and particular to France during this period. In the end, he offers a neo-Tocquevillian account of a topic which Tocqueville himself notoriously underemphasized, namely the emergence of elements of a modern economy in eighteenth century France and the place this development had in explaining the failure of the Old Regime and the onset of the Revolution. Compass of Society will aid in understanding the conflicted French engagement with liberalism even up to the twenty-first century.

Young Entrepreneurs in Sub-Saharan Africa Vocational & Technical Schools West More Than 2,300 Vocational Schools West of the Mississippi River

Young people in sub-Saharan Africa are growing up in rapidly changing social and economic environments which produce high levels of un- and underemployment. Job creation through entrepreneurship is currently being promoted by international organizations, governments and

NGOs as a key solution, despite there being a dearth of knowledge about youth entrepreneurship in an African context. This book makes an important contribution by exploring the nature of youth entrepreneurship in Ghana, Uganda and Zambia. It provides new insights into conceptual and methodological discussions of youth entrepreneurship as well as presenting original empirical data. Drawing on quantitative and qualitative research, conducted under the auspices of a collaborative, interdisciplinary and comparative research project, it highlights the opportunities and challenges young people face in setting up and running businesses. Divided into a number of clear sections, each with its own introduction and conclusion, the book considers the nature of youth entrepreneurship at the national level, in both urban and rural areas, in specific sectors - including mobile telephony, mining, handicrafts and tourism - and analyses how key factors, such as microfinance, social capital and entrepreneurship education, affect youth entrepreneurship. New light is shed on the multi-faceted nature of youth entrepreneurship and a convincing case is presented for a more nuanced understanding of the term entrepreneurship and the situation faced by many African youth today. This book will be of interest to a wide range of scholars interested in youth entrepreneurship, including in development studies, business studies, youth studies and geography, as well as to development practitioners and policy makers. Seventh-day Adventists and the Civil Rights Movement is the first in-depth study of the denomination's participation in civil rights politics. It considers the extent to which the denomination's theology influenced how its members responded. This book explores why a brave few Adventists became social and political activists, and why a majority of the faithful eschewed the movement. Samuel G. London, Jr., provides a clear, yet critical understanding of the history and theology of the Seventh-day Adventist Church while highlighting the contributions of its members to political reform. Community awareness, the example of early Adventist pioneers, liberationist interpretations of the Bible, as well as various intellectual and theological justifications motivated the civil rights activities of some Adventists. For those who participated in the civil rights movement, these factors superseded the conservative ideology and theology that came to dominate the church after the passing of its founders. Covering the end of the 1800s through the 1970s, the book discusses how Christian fundamentalism, the curse of Ham, the philosophy of Booker T. Washington, pragmatism, the aversion to ecumenism and the Social Gospel, belief in the separation of church and state, and American individualism converged to impact Adventist sociopolitical thought.

REVIEW OF COMPASS SOUTH SUBURBAN COLLEGE

- This account of the Luftwaffe's cooperation with the German army in the east during the long year from March 1942 to 1943 is historical reconstruction at its very best. Expertly it explains war in all its levels, from tactical to operational to strategic, and it focuses for the first time in any such book on the complex everyday operating relationship between ground and air forces. Scholars may think Hayward too hard on Hitler's and Goering's "incompetent" decision-making, but they'll be hard-pressed to disprove his theories. That's because Hayward's account is based on unpublished wartime documents and diaries. You don't have a complete record of Stalingrad without this book!
- I found this book to be very out of date. I can't count how many times I read "coming in 2000" and then no info on the subject. I didn't expect this from a book written for 2001. I have the 2000 official guide and it is much more up to date. The only thing I liked about the book is the coverage of non disney parks. This book was a huge waste of money.
