REVIEW OF APPLICATION NOTE NO 066 INFINEON TECHNOLOGIES

- huxley should be read by any serious

literature student

- I found this book to be far less intriguing than the other two negative-Utopias. Dealing with a world full of predestined drones, the book tells the story of a savage who is introduced to the "new" and "happy" world, and is forced to make a choice between it and a life of solitude. I found the characters a bit unrealistic, almost forced into their unfitting surroundings, but the story was meaningful and didactic. I would still recommend it as a worthy glance into the future.
