REVIEW OF FOOD CHAIN STUDENT GIZMO ANSWERS

- "Journey to Ixtlan" is a long and unbalanced (sometimes repetitive) dialogue between Don Juan, the sorcerer, and his apprentice. Unbalanced to the extent that the apprentice is humble, naive, easily taken by Don Juan's views, unable to effectively counter-argue the teachings of the sorcerer. The reader is taken into a long and fantastic journey through the desert, where he is slowly introduced into the teachings of Don Juan. For him, the world of everyday life is not real as we believe it to be. Reality is merely one of various descriptions, therefore we have to learn

how to "see" as opposed to merely "looking," and "stopping the world" is the first step to "seeing." Once the apprenticeship is finished we have learned a new description of the world and are able to elicit a new perception, one has gained "membership." We must break the dogmatic certainty, which we all share, that the validity of our perceptions is not to be questioned. In the long process we must learn to erase personal history, remodel most of our behavior, self-importance must be dropped, we must take full responsibility for our actions, and accept death as the only wise adviser. You become a hunter once you learn to separate the images and see two of everything, you become accessible to power and learn how to tackle your dreams. You become a man of knowledge because you have unravelled the secrets of personal power. A man is only the sum of his personal power, and that sum determines how he lives and how he dies. Carlos Castaneda, an active member of the New Age Movement, had millions of followers around the world. His writings are supposedly based on personal experience, on his studies on the effects of certain medicinal plants and the teachings of a shaman who used hallucinogens to initiate his students into an occult world. His personal life has remained a mystery, as much as his cult, and his literary success is not actually based on quality but rather on being appealing to human thirst for myth, magic, self-improvement, and the imaginary.

- This is a stunning book. It should be required reading for every medical professional. Doctors, nurses, and therapists, should have to read it twice, once in their first year of study and

again before they graduate. I'm serious. And that is not to say that only medical professionals will benefit from reading this well-written book. Kathleen Bosworth tells her touching story from the lay person's point of view. From that first heart gripping moment when she gets the bad news about her mother's stroke by phone, to the last page, the author's personality shines through. Her outrage, quiet humor, and sense of decency make this book stand out in ways it never might have if a lesser writer had created it. Ms. Bosworth's mother had a stroke. That much can be gleaned from the title. From there the author takes each reader through a

maze of doctors, nurses, and therapists who are less than helpful. Some are downright rude, or maybe ignorant. Her search for answers, and for professionals who have hearts as well as brains is detailed honestly. With the support of a loving, close-knit family, she struggles to find a constructive way of managing her mother's care. Kathleen Bosworth educates herself about treatment plans, possible outcomes, patients rights, living wills, and insurance coverage. With courage and determination, she and her brother fight the system to get their mother the loving care she needs and deserves. I recommend this book to everyone and repeat again: This is a stunning story.
