REVIEW OF BASIC CHESS OPENINGS

- Excellent campaign study of the battle of Ligny. Many good maps at both the campaign and tactical level (much improved from the 1st edition from 1994). Several good appendices on D'Erlon's meanderings, Ney's blunderings, communication breakdowns, and a tour of the battlefield today. Blucher emerges as the true hero, which is unusual in histories of the 1815 campaign. Good exposition of how the "other half" of this double battle (Quatre Bras) influenced Ligny. Very nicely written.

- The author's expertise is mostly in the natural world, so the most detailed and persuasive in his explanations of the future effects of global warming on nature. It's clear that the world our great-grandchildren will inherit is not going to resemble the one we live in now. Lots and lots of species, perhaps most, will be gone. If I have a quibble with the book it's his focus on what we can do as individuals to reduce climate change. Not that he's wrong to point it out, but in the end, this is a problem that can only be solved if the governments of the world decide to take action.
