York Times, The Guardian, or NPR. Their publication testimonial areas are well-respected and deal insightful critiques of the current launches.

So there you have it, a few of the most effective locations to find A Level Physics Notes publication testimonials. Remember, reviewing evaluations can aid you make informed choices about what to read next and can expose you to brand-new writers and categories you might not have actually considered previously.

REVIEW OF A LEVEL PHYSICS NOTES

• F.W. Hirst's 1934 book "The Consequences Of The War To Great Britain" was originally produced as part of a broader, multiple volume, series written by multiple authors. This book, written by a former editor of "The Economist" (1907-1916) would make an excellent secondary source for the student of the "inter-war" era, but it still has lessons for today. In particular there is a detailed account of the British budgets from the end of the Great War to the start of the Great Depression. Hirst sees the later as very much the child of the former. Apart from the "normal" ravages of war, the participating states constructed a pyramid of debt to lay on the backs of future citizens. The pyramid was jerrybuilt with a complex system of international loans and reparations. These often trickled from one country to another. During the war, the US would mainly lend to Britain, the most solvent combatant, and Britain would lend to it's less solvent allies. After the war, the "Hang The Kaiser" politics of revenge ensured an unsustainable reparations system would be imposed on the already dismembered and defeated central powers. More international loans would be raised to keep the faultering reparations system afloat. Whilst the pyramid was going up, the real foundations of global prosperity were being undermined. Wartime nationalism and wartime shortages fed both economic nationalism and 'infant industries' both of which begat protectionism. The effective repudiation of free trade undermined the ability of all the western states to work themselves out from under their self imposed burdens. Britain's premature return to the gold standard whilst attempting to honour war debts to the US, debts that is was unable to pay off without access to US domestic markets, thanks to the new tariff walls of the 1920s, is what finally broke the camel's back. Hirst's analyses of the successive British budgets provides a blow by blow description of this process, although it may be heavy going for the economics layman. In "Consequences" Hirst focuses primarily but not exclusively on economics. Hirst was an old style "Cobdenite" classical liberal, from the school that opposed the Empire. Hirst was a Cobdenite in more ways than one, he actually married into Cobden's family. During the Boer War, Hirst had worked closely with fellow Cobdenite J.A. Hobson who, once it became clear that the Liberal Party hierarchy had lost their taste for free trade, went on to develop an "underconsumptionist" theory of the economics of war and imperialism, that was later adopted by V.I. Lenin and has influenced the radical critique of western foreign policy ever since. Although his critique of British foreign policy and strategy is oblique it is quite incisive. In true Cobdenite manner, Hirst retains his skepticism of the Liberal Asquith government's decision to go to war in the first place. And, in the second place, he critiques the amendment of secondary 'imperial' war goals to what was originally supposed to be a war to restore Belgian independence. Hirst sees the 'remote' combatant and proxy British campaigns in Palestine, Italy and Russia as more diverting for British military power than for that of Central Powers. One consequence being the record high losses inflicted on British forces on the Western Front in 1918. Hirst also raises Cobdenite criticism of Britain's often overlooked "limited wars" after the Great War, the wars in Ireland, Mesopotamia and Russia. Hirst sees the Labour movement, bolstered by changes to the electoral franchise, and socialism in general as being able to capitalise on the popular postwar reaction against war and militarism. Implicit in this is perhaps a Cobdenite rebuke to his fellow Liberals for softening their opposition to the Empire. Hirst believed the widespread postwar revulsion against war, censorship and conscription had largely restored the status quo ante. At least in terms of civil liberties, which had been severely threatened by war measures, including propaganda, censorship and DORA (the Defence Of the Realm Act) which undermined habeas corpus and struck at historical English liberties rooted in Magna Carta, the Petition of Rights and (English) Bill of Rights. He was unfortunately overly optimistic here. Despite pacifist pledges and League of Nations clubs in the 1920s and 30s, governments found it easier to reimpose controls the second time round. Hirst also noted that the wartime attacks on civil liberties in the US, were, if anything, worse than in the UK.Hirst is an excellent and fluid writer, but this is not always the easiest book to read. The long third devoted to the budgets can be something of a chore to wade through for the non-economist. Still Hirst's insights and observations make the trek worthwhile. He describes how a well advanced Home Rule movement for Ireland was derailed by the Great War, reanimating violence and sectarianism. He illustrates how the real roots of India's late 20th century experiment with industrial protectionism really had it's roots in the protectionist policies pursed by the semi-autonomous Indian Empire authorities in the early 20th century. As a former biographer of Thomas Jefferson, Hirst is able to cite a Jeffersonian precedent to the argument that a debtor nation is under no obigation to repay it's creditor if said creditor closes his markets to debtor's exports. (Take that Uncle Shylock!). Hirst shows how wartime policies created the preconditions for the 1926 General Strike. He provides some colour on great individuals. Writing in 1934, before the heroic mantle had been added, Hirst tags Churchill as an opportunist whose rhetorical escapades reminded him of "a Gilbert and Sullivan opera" (p.205). One of his real heroes is the remarkable, but unfortunately ignored, pro-peace campaigner Lord Landsdowne. Hirst's writings, of course, are still relevant today. Again we see a great Imperial power commence war for one reason, against one enemy, only to inflate it's enemy list to cover less justifiable campaigns elsewhere. Again we see ancient liberties under pressure and national debt balloon. Only in the last few weeks, David Walker, Comptroller General of the United States, the US government's top accountant, has been ringing alarm bells at the unsustainable growth of US national debt, growth induced mainly by baby boomer entitlements but aggravated by new wars. Again we see protectionism now with renewed respectability, and freshly minted "green" credentials, promote "anti-globalisation" becomes a rallying cry. Luckily, again we do see, as in the 1920s, a renewed popular revulsion against war, but the precedent Hirst illustrated is hardly cause for comfort.

• workman has another success for animal lovers and those who just like to mock stupid dogs--essentially the entire population of literate people can appreciate the humour of these images. better than Bad Cat!
