REVIEW OF BEGINNERS TO LIQUID CHROMATOGRAPHY WATERS SERIES

- I think the power of this book is that since it is written mostly as a conversation all of the information presented seems much more real than in most books. One really feels invited to step into the fullness of the Orthodox faith. It is true that the author interjects his own opinions in places and that more of a theological framework is needed to fully understand Orthodoxy. But I still give the book five stars because no other book has moved me so deeply towards longing to live in the presence of God. If you want to understand more Orthodox theology I recommend "The Mystical Theology of the Eastern Church" by Vladimir Lossky. For a more in depth and scholarly introduction

to Orthodox Spirituality I recommend "The Spirituality of the Christian East" by Tom Spidlik.

- I loved this book about John Paul II (the Pope of Hope)!!! The authors gave us a little of everything, not an easy task for a man with so much history behind him. This is the first book where I have gone

over pages more than once, twice. I wanted to absorb every word, every picture. The side stories were also a special treat. I respect and admire the pope even more. I now feel well prepared to read George Weigel's recently published autobiography on JPII, Witness to Hope. Thank you Monsignor Virgilio Levi and Christine Allison for giving us something so inspiring.
