### REVIEW OF ROCK SHOX TORA SERVICE GUIDE

- If you liked 1984 then you will love this book. In a utopian society everything seems great but to me blind happiness is no good. This book kept me interested while challenging my thinking.

- There was once a person in this world who felt no one individual was indispensable and that no one deserved to attract as much attention and curiosity as he or certain other people did. He did not believe that ideologies resided within people but rather felt that ideologies move forward in time with their own momentum and humans are but only vehicles for what is destined to be. He considered that everyone is totally entitled to whatever choice of words they may use to refer to this momentum, whether it be chance or fate or destiny or something larger. And he believed that lynching human beings does not abolish any given way of thinking for the same reasons. He was an ordinary man and believed that he was only human with both good and bad qualities, like any other. He was surprised and deeply pained to see all this hatred directed against him and others around him and this thirst for blood and he wondered why it had to be this way. He never thought of himself as being a polarizing figure but rather someone who always strived to seek middle ground in everything by trying to look at things from all perspectives including reading different viewpoints and attempting to look at both the good and bad in what he saw and believed there were other human beings in this world who shared his way of thinking. He had always felt that considering all perspectives on any arguable issue including attempting to look at and actually live life differently for a change was acceptable. He wished everyone would let him move on with his life to where he would not be attracting attention and controversy and deeply hoped that things for everyone around him would return to where they were before this started. He sincerely hoped that this was not too much to ask. The only criticism of this book is that one wishes that Aldous Huxley had not written the end they way that he did. However there is no question that the end was written the way that it was in order to strengthen the impression that this is nevertheless a piece of fiction!
