REVIEW OF EXAMPLE CASE MANAGEMENT NOTES

- "Weep Not, Child" chronicles a young boy, Njoroge, as he grows up amidst the Mau Mau war and the conflict between

the African natives and the British colonial rulers. The book is in essence about the hopes and dreams of a young boy coming being affected by the outside world and how the outside world changes a person. The novel also addresses the political conflict that was occurring in Kenya in the 1950's. The author incorporates a description of the power of the white rulers, the bitterness of the Africans at being enslaved on their own land and their attempt to rise up against the tyranny, and finally deals with the poor relations between the blacks and Indian merchants, who are looked down upon by the black community. I read this novel as a part of my IB English class. We read this book in combination with "1984" (Orwell). It was a very powerful story when it dealt with

Njoroge's life, his thoughts and his feelings but due to the length of the novel (136 pages) one only gets a fairly superficial explanation of the historical and cultural context of the book. Also, this novel is a book in translation, so some of the sentence and grammatical structure can be a bit tricky at times. All in all, a very good book.

- Lomborg's book is interesting not simply because it devastates so many of the popular icons of the deep ecologists and chicken littles. Those familiar with *both* sides of the debate will be familiar with many of the relevant facts. This book is important because it has helped reveal how anti-rational many members of this community are. The Amazon.com reviews themselves exemplify this. Notice the repeated ad

hominem fallacies--Lomborg isn't relevantly credentialed; he only wrote it to make money; he has an ideological agenda; he is simply serving corporate interests. Apparently logic isn't highly prized in this community, since none of these points, even if true, has any relevance to the truth of his evidence or the validity of his arguments. Notice the repeated appeal to authority. They declare: "Just read the credentialed, world renowned scientists who critique him in the Scientific American and elsewhere." Why, one wonders, does no one bother to summarize those "devastating" arguments from Scientific

American? Perhaps it is because anyone who reads them will recognize them as, for the most part, ad hominem rants. So please, dear enquirer, read Lomborg's book for yourself, and by all means, read all those "devastating" reviews in Scientific American, Nature, Science, etc. Compare the quality of argumentation and evidence for yourself. And then ask: Why do I trust these people who claim to speak for science? Science etymologically means "knowledge," and we gain knowledge of nature by way of empirical evidence and rational argument based on that evidence, not by cowing to raw appeals to authority.
