So, what are you awaiting? Beginning your analysis journey today with electronic Biology Raven Johnson Mason 9th Edition publication downloads. With a lot of titles and genres to pick from, the possibilities are countless. Pleased reading!

## REVIEW OF BIOLOGY RAVEN JOHNSON MASON 9TH EDITION

- In the footsteps of Klosterman's Midwestern memoir/history of hair metal (Fargo Rock City) comes this collection of eighteen essays bearing the asterixed subtitle "A Low Culture Manifesto". The subtitle itself speaks volumes about the author's general style: a hyper-ironically witty phrase that displays a certain level of erudition along with a wink-wink, nudge-nudge. Klosterman is almost exactly my age, which means that our broad exposure pop culture exposure has been nearly identical, and while I greatly enjoyed the majority of the essays, there's a tension in his writing between wanting to make fun of low culture, and wanting to treat it seriously. It's the same tension (and flaw) of Fargo Rock City-he's writing about his guilty pleasures, but can't quite commit to the guilt or the pleasure. All that aside, I've probably recommended this book to more friends of mine than any other in recent months. If you browse it in the store be aware that the first essay (about how John Cusak, and emo songsmiths like Coldplay have made the concept of love very tricky for Gen Xers- or at least middle-class white ones), is far and away the best in the book. Which is not to say there isn't a lot of other great stuff. The second essay, about the computer game The Sims, is hugely funny (if only slightly insightful) and the fifth (which first ran in The New York Times Magazine) is an engaging account of a

weekend spent on the road with a Guns N' Roses cover band. The sixth is also quite strong, being a comparison of Pamela Anderson with Marilyn Monroe that seeks to explain how the role of celebrity has changed over the half-century between them. His essay on internet porn is brief, funny, and moderately thoughtful. Essay ten, on children's breakfast cereals is almost entirely tongue in cheek, and is hilarious. His thirteenth essay wins the prize for best title ("The Awe-Inspired Beauty of Tom Cruise's Shattered, Troll-like Face"), and is a mostly enjoyable muddle of thoughts about contemporary film. After this is a rather wandering (but good) piece on the popularity of country music. Essays sixteen and seventeen are all about the media. The first is a sort of general purpose "here's the truth about the media from an insider" piece, and the second is a very keen report on music critic's conference. Closing things out is a critique of the wildly popular "Left Behind" series. I would recommend all of these to various of my friends. However, a third of the book isn't so good.. The third essay is about MTV's The Real World series, and fails to make any original points about the reality genre. The fourth is a tortured attempt to explain why Billy Joel is cool, and fails on all levels. The seventh entry is a really weak anti-soccer piece that is a total failure except for a portion where he details his job as a youth baseball coach and subsequent firing. The next essay, about the Lakers/Celtics rivalry of the '80s is equally muddled, and incoherent (probably way more so to those who weren't paying attention to the NBA in the '80s). Essay eleven is about the seminal TV show Saved By the Bell, which I've never watched, so that one went right over my head. This is followed by a rather weak essay attempting to tie Gen X malaise to The Empire Strikes Back. Klosterman's writing style is kind of love it or hate it (I love it). He's too clever and sarcastic by half, and doesn't mind showing it off, which can be kind of refreshing. He's also one of the best writers I've encountered when it comes to profanity-he uses it a lot and quite naturally, which helps to draw you into his bizarre little world. He's also a hilarious footnoter, for example, his essay on Internet porn starts: "When exactly did every housewife in America become a whore?" with the footnote reading "Except of course, my mom." He's also a very prolific digressor, which may infuriate those who want writers to adhere to their one main point, but I rather enjoy the little side trips. I found the 2/3 of the essays that I liked so engaging that I'm willing to let the other 1/3 slide-this time.

- Lectures on Physics is an extraordinary book written by an extraordinary man who goes far beyond the vanity of most breeders and generously devotes his imagination to devise experiments and reasoning available to non-physical (but smart) to allow these to glimpse of how beautiful is that science.
