REVIEW OF THE POST CARD FROM SOCRATES TO FREUD AND BEYOND JACQUES DERRIDA

- It is, without a doubt, one of the greatest feats in science fiction. Frank Herbert created one of the most detailed, most fascinating worlds in the history of SF. He didn't only create of single world, but an entire intergalactic empire, of which the world of Arakis (Dune) is the lynchpin. The characters are well rounded, with even minor characters having believable motives and some with histories that are obviously well thought out and full understood by the author even if he only hints at them within the book. Dune is a massive tome, but it takes that many pages to tell the epic tale that Herbert has set out upon. Definitely not to be missed. The only reasons I gave it 4 stars instead of five were (1) The books that follow are actually better than the first and (2) Herbert's foreshadowing is a little heavy handed...at times he tells us EXACTLY what will dozens of pages before it does.

- Dune is one of the best Sci-Fi novels available. This novel delves into the world and surface of the planet Arrakis..a desert planet that contains the most precious spice in the known universe.. 'Melange'. This spice allows for visions, longer life and space travel. The Spacing Guild navigators uses this spice to fold space and travel to any part of the universe without moving. Control of this planet is vital and whomever holds this place..rules. The Fremens live on this desolate planet and have a prophecy that a man would come..a messiah..to lead them on to freedom. Frank Herbert created a masterpiece of science fiction. This is the world of Paul Atreides, heir apparent to the House of Atreides. Filled with court intrigue, politics, mystical religious overtones, and technology, this novel flows in many different

directions. The main focus is that the House of Atreides has been chosen to rule Arrakis and there they are pitted against the House of Harkonnen for control of the planet..with the Fremen caught in the middle. Hidden in the back of this..and carrying alot of power and control..is the secretive female order called the Bene Gesserit.For those interested in Sci-Fi, this is a highly

recommended read. The part where Paul's younger sister Alia faces down Baron Vladimir Harkonnen (Leader of the House of Harkonnen) with her..poison needle 'Gom Jabber' was particularly satisfying.His other Dune series books are good, but they don't measure up to this first book. Well worth getting.
