Spessard and Miessler's Organometallic Chemistry, originally published by Prentice Hall in 1997, is widely acknowledged as the most appropriate text for undergraduates and beginning graduate students taking this course. It is a highly readable and approachable text that starts with the basic inorganic chemistry needed to understand this advanced topic. Unlike the primary competing book by Crabtree (Wiley), S/M places a strong emphasis on structure and bonding in the first several chapters, which lay the foundation for later discussion of reaction types and applications. The organization of material is much more accessible for students who have never seen organometallic chemistry before. In addition to being pitched at the right level for undergraduate students, S/M presents outstanding explanations of important core topics such as molecular orbitals and bonding and supports these discussions with detailed illustrations and praised end of chapter problems. The second edition has been significantly revised and updated to include advancements over the last ten years in NMR, IR spectroscopy, nanotechnology and physical methods. The authors have significantly updated four chapters (9, 10, 11 and 12). Chapter 9 (catalysis) has been revised to cover the advances in catalytic cycle research. Chapter 10 in the first edition, which covered carbene complexes, metathesis, and polymerization, has been divided into two chapters in view of the expanded research efforts that have occurred over the last ten years in these areas. Chapter 10 in the second edition now focuses on carbene complexes, and Chapter 11 covers aspects of metathesis and polymerization reactions including an expanded discussion of Schrock and Grubbs metal carbene catalysts. Chapter 12 (Chapter 11, first edition) is a substantially-revised treatment of the applications of organometallic chemistry to organic synthesis. This chapter offers an extensive discussion of asymmetric hydrogenation and oxidation methodology as well as a greatly revised treatment of Tsuji-Trost allylation, the Heck reaction, and palladium-catalyzed cross-coupling reactions. The latter topic includes discussion of the Stille, Suzuki, Sonogashira, and Negishi cross-couplings, reactions that have had a profound impact on the synthesis of anti-tumor compounds and other potent pharmaceuticals. In addition, the authors have included more molecular model illustrations, and introduced more modern examples and medical/medicinal applications across the text. They have included 53% more in-chapter exercises and end-of-chapter problems (23% more exercises and 81% more EOCs). The second edition has been extensively updated to include current

REVIEW OF INORGANIC CHEMISTRY MIESSLER SOLUTION MANUAL EBOOK

• I HAVE PLAYED GOLF SINCE I WAS 7 YEARS OLD. NEVER HAD LESSONS AND HAVE STRUGGLED ALL OF MY LIFE WITH THE GAME. BUT I LOVE IT!! AFTER READING (CHEWING ON) THIS BOOK MY GAME HAS TOTALLY CHANGED. SLICE IS GONE!! DISTANCE IS THERE EVEN WITH A SLOW SWING

SPEED.THIS BOOK IS THE GREATEST INSTRUCTION BOOK I HAVE EVER READ FOR ANY GAME. IT IS A MUST!!!

• Much good stuff had been said about this book and I am sure I cannot write one praise better than most of other reviewers. So, to add value, I would like to quote a passage of Philip Yancey on his book "How Good is God" of how Lewis, quoting the reply of William Booth, Founder of the Salvation Army, to Rudyard Kipling, responded to criticism against his unconventional books including this: "If I thought I could win one more soul to the Lord by walking on my head and playing the tambourine with my toes, I'd learn how." In short, a must read.p.s. Below please find some of my favorite passages for your reference.In civilized life domestic hatred usually expresses itself by saying things which would appear quite harmless on paper but in such a voice, or at such a moment, that they are not far short of a blow in the face. Pg13There is nothing like suspense and anxiety for barricading a human's mind against the Enemy. He wants men to be concerned with what they do; our business is to keep them thinking about what will happen to them. Your patient will, of course, have picked up the notion that he must submit with patience to the Enemy's will. What the Enemy means by this is primarily that he should accept with patience the tribulation which has actually been dealt out to him - the present anxiety and suspense. It is about this that he is to say "Thy will be done", and for the daily task of bearing this that the daily bread will be provided. It is your business to see that the patient never thinks of the present fear as his appointed cross, but only of the things he is afraid of. Let him regard them as his crosses; let him forget that, since they are incompatible, they cannot all happen to him, and let him try to practice fortitude and patience to them all in advance.....An important spiritual law is here involved, I have explained that you can weaken his prayers by diverting his attention from the Enemy Himself to his own states of mind about the Enemy. Pg26We want cattle who can finally become food; He wants servants who can finally become sons. We want to suck in. He wants to give out. We are empty and would be filled; He is full and flows over. Our war aims is a world in which Our Father Below has drawn all other beings into himself; the Enemy wants a world full of beings united to Him but still distinct. Pg39All we can do is to encourage the humans to take the pleasure which our Enemy has produced, at times, or in ways or in degrees which He has forbidden. Hence we always try to work away from the natural condition of any pleasure to that in which it is least natural, least redolent of its Maker, and least pleasurable. An ever increasing craving for an ever diminishing pleasure is the formula. It is more certain, and it's better style. Pg44Talk to him about moderation in all things. If you can once get him to the point of thinking that "religion is all very well up to a point", you can feel quite happy about his soul. A moderate religion is as good for us as no religion at all - and more amusing. Pg46Let him do anything but act. No amount of piety of in his imagination and affections will harm us if we can keep it out of his will....The more often he feels without acting, the less he will be able ever to act, and, in the long run, the less he will be able to feel. Pg66-7You must therefore conceal from the patient the true end of Humility. Let him think of it not as self forgetfulness but as a certain kind of opinion (namely, a low opinion) of his own talents and character. Pg70The Enemy wants them to attend chiefly to two things, to eternity itself, and to that point of time which they call the Present. For the Present is the point at which time touches eternity....the duty of planning the morrow's work is today's duty. Pg75Because what she wants is smaller and less costly than what has been set before her, she never recognizes as gluttony her determination to get what she wants, however troublesome it may be to others.....The woman is in what may be called the "All I want" state of mind...because her "properly" conceals an insatiable demand for the exact, and almost impossible, palatal pleasures which she imagines she remembers from the past.... Pg88In the long run either Our Father or the Enemy will say "Mine" of each thing that exists, and specially of each man. They will find out in the end, never fear, to whom their time, their souls, and their bodies really belong - certainly not to them, whatever happens. Pg114-5
