Keep in mind, checking out evaluations can aid you make notified decisions about what to check out next and can expose you to new authors and categories you might not have actually thought about previously.

REVIEW OF MASTERING SYSTEM CENTER CONFIGURATION MANAGER

- An enjoyable survivalist tale, along the lines of "The Long Walk" or even Shackleton's "Endurance." Basically four workers escape an indentured work camp in Alaska, steal an Indian canoe and try to make it down the coast of British Columbia and what is now the state of Washington to make it to the settlement at the mouth of the Columbia River. The depictions of the water and scenery is good. The author spent some time researching the surroundings. The rough humor and tension between the men is hilarious. As they battled starvation during their journey my only question is why didn't they catch more fish, as that coastline is chock full of fish, but that's a minor detail. Love the scene where they get to witness a Northwest Indian tribe bring in a whale, as that is of historical significance. You'll feel an ache in your own back and blisters on your own hands as you empathize with their journey. First book of his that I've read, and I now want to find more.

- The best buy ever!! If anyone is thinking of buying any prep material for the TOEFL, look no further. There's enough practice to get the score you need.
