REVIEW OF ELECTRODIAGNOSIS IN DISEASES OF NERVE AND MUSCLE PRINCIPLES AND PRACTICE

- If you've never read any of Vonnegut's books, this is a great place to start. This is a well paced story of an American posing as a Nazi sympathizer in WWII Germany. Working as a spy for the US Government, Howard Campbell broadcasts Nazi Propaganda,

filled with coded messages for Allied forces. His choices leave his life in ruins, and make him a 'war criminal', years later. As a side note, this was also made into a pretty "true to the original book" movie.

- This book represents a first. No other popular book has been written about what most defined nuns to most people: their clothing. Although most of the foundresses (most founders were women) deliberately adopted the prevailing clothing of poor women or widows around them, history and the dominant clergy soon mandated that these clothes never change, and in time become not only outmoded but outlandish, dirty and dangerous. Popular accounts written by nuns at a much later date describe the time necessary to maintain these creations, the dirt they accumulated, smells and sweat they caused, and the unnecessary accidents caused by nuns driving in them, as well as their dangerous impracticality and flammability in true emergencies, such as the notorious 1058 parochial school fire in Chicago in 1958. None of this is included in this conventional, rather sweet and pious book. The author claims much research, which doesn't show. The pictures are almost all out of the many editions of "Guide to the Catholic Sisterhoods in the United States", which is available on CD-ROM. I wish that I could recommend another book, but there isn't one as such; there are many accounts written by nuns and former nuns living in the period of the full habits, which can be found on google.com, amazon.com, or bookfinder.com. All of them will give a very vivid account of life within a coffin.
