REVIEW OF STURM LIOUVILLE THEORY AMS

- I don't believe Albert Camus had any that idea that his novel 'The Stranger' would be so popular and timeless when he wrote that book in 1946. It is not a fluke, but he didn't seem to have many aspirations and pretensions when writing this short, but amazing, book. In a nutshell, 'The Strange' is the story of an Algerian, Mr. Meursault, who loses the strings of his life, and leads a flow of events decide his fate. The narrative begins of the death of his mothers. He is forced to go to the retirement house where she used to live and attend the funeral. In doing so, he feels strange, and doesn't seem to have any tender feeling toward his dead mother-- to the surprise of the local people. Later on he starts dating Marie --but notice he doesn't love her. It is just that it is easier to be with her, than being alone. He ends getting involved with Raymond --who seems to be not very honest. And in an unfortunate event he kills an Arab. That's when his life falls apart. Well, it would, if he was a normal person but he is not. Camus has created a vivid --albeit lacking in energy and chutzpah -- character to be the protagonist of his novel. Meursault is not a normal person, however he is just the French average Joe of the mid 40s. He doesn't have many aspirations for his life; he lets the flow of events drive his life. The book is so well written that after a couple of pages you really feel upset with him. Is he incapable of showing feelings, or doesn't he have any feelings? These are questions raised throughout the novel, but it seems that the writer never came up with a plain answer to that, because it is not easy. Like it is stated in the novel 'Everything is true and nothing is true.' Like in life, it is nothing is really one thing. It all depends on a referential to what is true and what is not. Meursault seems to not have this referential. He simply doesn't care about being alive and governing his life. With this Camus shows all that generation angst. They seem to lack strong feelings, or even any kind of feelings. 'The Stranger' is one of the 20th Century classics, one of those books destined to be discussed forever-- because it generates so many different interpretations. More than book, it became a cultural event. It is a novel that deserves multiple readings.
