Magic will make you invincible. If it doesn't kill you first. In a world where magic is punishable by death, brothers Aric and Fadan stumble upon a mysterious, ancient book - A Manual of Magic. They are faced with a choice: take the book straight to the Emperor or see if one of them has the forbidden magical Talent. A decision that will change their lives, and the Empire itself, forever. The brothers are swept away, sent to opposite ends of the world, one to train as a Dragon Hunter while the other taps into magical powers that could spell his execution. Dark forces are moving in the shadows, and while the nobility whispers of rebellion, an ancient evil, long thought gone, is about to awaken. Can Aric and Fadan save the Empire? Will they survive to ever see each other again?

The articles in this volume present original research on the encoding of meaning in a variety of constructions and languages. Many of the contributions take the framework of Role and Reference Grammar as a point of reference, either by applying it to the analysis of linguistic data or by discussing, extending, and challenging some of its assumptions. The topics of the articles range from general questions concerning the relation of meaning and its syntactic realization to the study of specific grammatical phenomena in a number of typologically diverse languages, including Yucatec Maya, Kabardian, Tagalog, Murik-Kopar, Avatime, Whitesands, Tundra Yukaghir, and various Indo-European languages. The articles will be of interest to researchers and advanced students working on the interface between syntax, semantics and pragmatics. This series 'Studies in Language and Cognition' explores issues of mental representation, linguistic structure and representation, and their interplay. The research presented in this series is grounded in the idea explored in the Collaborative Research Center `The structure of representations in language, cognition and science' (SFB 991) that there is a universal format for the representation of linguistic and cognitive concepts.

REVIEW OF LIVRE TECHNIQUE MEGANE 1

- The secret panel by Franklin W. Dixon was a great book. It was about two boys that have to find a kid napped nurse and boy. the Hardy boys always solve their mysteries well.The message of this story is that you should never give up because the Hardy boys never give up. I follow this theme by never giving up. I think this is a good theme.I think that the author really made the characters seem real. I also like how he developed the mystery.I really liked this book. I would recommend it to anybody. If someone asked me I would tell them that it is a great book.Sean of pacifica
