### REVIEW OF 14 QUESTION PAPER FOR N1 ENGINEERING SCIENCE

• When I try to think of my reaction to this book, it goes beyond enthusiasm. In fact, at first, I was speechless after reading the last sentence; the build-up was so intense that I actually thought that I was reading a historical account of the human experience. For those of you who haven't read the afterword by Erich Fromm, I highly recommend you do. He provides a much needed explanation for

Orwell. This book offers a very important vision, one that needs due evaluation. If you read this account of the future, you must read Huxley's Brave New World, as he offers an alternative.

• George Orwell's last book - 1984 was published in 1949 for the first time. It has since been reprinted in 1961, 1977, 1981 and 2003. Many reviews have been written. I do not presume to have anything new to say about the book. As the author of the foreword of the Centennial Edition, Thomas Pynchon, observed "It is not difficult to guess that Orwell, in 1984, was imagining a future for his son's generation, a world he was not so much wishing upon them as warning against. He was impatient with predictions of the inevitable, he remained confident in the ability of ordinary people to change anything, if they would." It seems to be a thread woven through the book... "that human decency, like parental love, can always be taken for granted - a faith so honorable that we can almost imagine Orwell, and perhaps even ourselves, for a moment anyway, swearing to do whatever must be done to keep it from ever being betrayed." In his Afterword, Eric Fromm offers this observation. "Orwell. . . is implying that the new form of managerial industrialism, in which man builds machines which act like men and develops men who act like machines, is conducive to an era of dehumanization and complete alienation, in which men are transformed into things and become appendices to the process and production and consumption... Orwell... is not a prophet of disaster. He wants to warn and awaken us.... the danger with which all men are confronted today, the danger of a society of automatons who will have lost every trace of individuality, of love, of critical thought, and yet who will not be aware of it because of 'doublethink.'" Fromm continues "Books like Orwell's are powerful warnings. and it would be most unfortunate if the reader smugly interpreted 1984 as another description of Stalinist barbarism, and if he does not see that it means us, too." As in all timeless creative writing Orwell has given us, the reader, many lessons. He has raised the alarm - it is up to us - 21st century humans - to heed it.
