Coastal Wetlands BRILL

Soggy Sneakers has been Oregon's primary source of information for whitewater enthusiasts since 1980. Members of Willamette Kayak and Canoe Club—who have run nearly all of Oregon's rivers—share their expertise and detail rapids and landmarks found on each run. There's something for everyone, from Class 1 (flatwater) excursions to Class 5+ (most challenging) rapid-filled adventures.

Headquartered in Corvallis, Oregon, Willamette Kayak and Canoe Club is a nonprofit organization dedicated to teaching kayaking and canoeing skills, promoting water safety, preserving and protecting the free-

flowing rivers of Oregon, and developing the camaraderie of their sport. Learn more about them at www.wkcc.org.

Studies in the Principles of Geography
African Books Collective

This book focuses on the effect of psychological, social and demographic variables on student achievement and summarizes the current research findings in the field. It addresses the need for inclusive and interpretive studies in the field in order to interpret student achievement literature and suggests new pathways for further studies. Appropriately, a meta-analysis approach is used by the contributors to

show the big picture to the researchers by analyzing and combining the findings from different independent studies. In particular, the authors compile various studies examining the relationship between student achievement and 21 psychological, social and demographic variables separately. The philosophy behind this book is to direct future research and practices rather than addressing the limits of current studies.

The Economics of Who Goes Where and Why
Springer Nature

The Politics of Laughter in the Social Media Age: Perspectives from the Global South brings to critical and intellectual attention the role of humour in the digital era in the

Global South. Many citizens of the Global South live disempowered and precarious lives. Digital media and humour, as chapters in the volume demonstrate, have empowered these citizens through engagement with power and their peers, enabling a pursuit of a better future. Contributors to the volume, while alive to challenges associated with the digital divide, highlight the potentials of social media and humour to engage and seek redress on issues such as corruption, human rights violations, racism and sexism. Contributors expertly analyse memes, videos, cartoons and other social media texts to demonstrate how citizens mimic, disrupt,

ridicule and challenge status quo. This book caters for academics and students in media and communication studies, political studies, sociology and Global South studies.

Zimbabwe's Fast Track Land Reform Redleaf Press

Desire, love, hot sex, cool sex, grieving and thriving as a Jewish dyke - it's all here in this rich and warm debut collection of short stories. From the flirtatious adventure of Bobby Silverstein to the in yer face politics of Kayla Rosenbaum, *In Her Nature* beats with the heat-seeking energy of women who grab life by the gut and live it to the max. A delicious slice of life born and lived lesbian.

Eratosthenes' "Geography" Corwin

Press

This four-part multidisciplinary volume linearly engages with Zimbabwe's not too distant past and present socio-economic and political situation to 2017. It traces, explores, and analyzes the proceedings and internal mechanisms of the country's state of crisis via eclectic lens to primarily argue that, while during the colonial era some western governments were, and could indeed be implicated and held complicit for the negative developments in the country, post-independence, particularly from 1997 to 2017, Zimbabweans must objectively, individually and collectively introspect and take responsibility

for some of the crisis. Part 2 consequently examines and paradoxically, both commends and condemns the agency of both the then Mugabe-led government and those Zimbabweans who refused to be victims and devised strategies to survive the crisis, albeit, at times, by victimizing others. Part 3 scrutinizes the highs and lows of the crisis by focusing on some of the prominent personalities of the crisis period covered. It premises that as a result of the November intervention by the military, the crisis had by 2017 reached a watershed, one that could either abate or exacerbate the crisis after Zimbabwe's elections in 2018. Despite the uncertainty

which lay ahead, Part 4 audaciously and optimistically, proffers and charts prospective paths and possibilities which are open to the country as it faces the future.

Environmental Geomorphology
Academic Press

This book provides a significant contribution to the literature on land reform in various African contexts. While the economic evidence is clear that secure property rights are a necessary condition for catalysing broad-based economic development, the governance process by which those rights are secured is less clear. This book details the historical complexity of land rights and the importance of understanding this history in the process

of trying to improve tenure security. Through a combination of single country case studies, comparative case studies and regional comparisons, the book is unequivocal that good governance is paramount for improving the performance of land reform programmes. All attempts at moving towards more formal secure tenure require congruence with informal norms, beliefs and values, and a set of clear systems and processes to avoid corruption and unintended negative consequences.

This proven, accessible approach to a curriculum presents a learner-centered approach to math education.

Mathematizing provides both the emergent curriculum and professional development frameworks to help young children learn math throughout their everyday routine and to facilitate teachers' understanding of how to see and support children's math learning at every turn. With this book and its plentitude of case studies, illustrations, photographs, and documentation, the mathematizing adult can interpret children's interests and use that knowledge as a catalyst for creating meaningful and

purposeful mathematical lessons and interactions.

Debates in Geography Education Routledge

One of the keys to achieving sustainable development is changing the production patterns that waste resources and emit more pollutants than our ecosystem can absorb. Reviewing case studies and experiences was not enough to implement changes. What was needed was technical and financial assistance to help

companies get started. UNEP and UNIDO worked in a proactive partnership to establish the "National Cleaner Production Centres" with a hope that they would serve as a model to be replicated by other countries. The aim of this publication is to provide some guidelines to those wanting to learn from the experiences, positive or negative, of the UNIDO/UNEP National Cleaner Production Centres, so that they can move forward on their own and thus contribute towards changing production patterns in their countries.

Coastal wetlands are under a great deal of

pressure from the dual forces of rising sea level and the intervention of human populations both along the estuary and in the river catchment. Direct impacts include the destruction or degradation of wetlands from land reclamation and infrastructures. Indirect impacts derive from the discharge of pollutants, changes in river flows and sediment supplies, land clearing, and dam operations. As sea level rises, coastal wetlands in most areas of the world migrate landward to occupy former uplands. The competition of these lands from human development is intensifying, making the landward migration impossible in many cases. This book

provides an understanding of the functioning of coastal ecosystems and the ecological services that they provide, and suggestions for their management. In this book a CD is included containing color figures of wetlands and estuaries in different parts of the world. * Includes a CD containing color figures of wetlands and estuaries in different parts of the world.

Confronting the Land Governance Deficit
Springer

How are abstract concepts and words represented in the brain? That is the central question addressed by the authors of "Words as Social Tools: An Embodied View on Abstract Concepts". First, they focus on the

difficulties in defining what abstract concepts and words are, and what they mean in psycholinguistic research. Then the authors go on to describe and critically discuss the main theories on this topic with a special emphasis on the different embodied and grounded theories proposed in cognitive psychology within the last ten years, highlighting the advantages and limitations of each of these theories. The core of this Brief consists of the presentation of a new theory developed by the authors, the WAT (Words As social Tools) view, according to which both sensorimotor (such as perception, action, emotional experiences)

and linguistic experiences are at the basis of abstract concepts and of abstract word representation, processing and use. This theory assigns a major role to acquisition: one of the assumptions the authors make is that the different ways in which concrete and abstract words are acquired constrain their brain representation and their use. This view will be compared with the main existing theories on abstractness, from the theory of conceptual metaphors to the theories on multiple representation. Finally, the volume illustrates recent evidence from different areas (developmental, behavioral, cross-

cultural, neuropsychological and neural) which converge with and support the authors' theory, leading to the conclusion that in order to account for representation and processing of abstract concepts and words, an extension of embodied and grounded theories is necessary.

Our web site is made to prioritize benefit and rate, so you can swiftly obtain access to the documents Energy Mutodi A Level Geography. You will not have to waste your time determining complicated download treatments or handle prolonged waits. Our simple user interface makes sure a seamless experience.

Debates in Geography Education encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy

and practice in the field, as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include: geography's identity as an academic discipline; what constitutes knowledge in geography; places and regional geography; what it means to think geographically; constructing the curriculum; how we link assessment to making progress in geography; the contribution of fieldwork and outdoor experiences; technology and the use of Geographical Information; school geography and employability; understanding the gap between school and university geography; evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, will help support and shape further research and writing. Debates in Geography Education is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education. In recent decades,
there has been a
substantial turn
towards narrative and
life history study. The
embrace of narrative
and life history work
has accompanied the
move to
postmodernism and
post-structuralism
across a wide range of
disciplines: sociological
studies, gender
studies, cultural
studies, social history;
literary theory; and,
most recently,
psychology. Written by
leading international
scholars from the main
contributing
perspectives and
disciplines, The
Routledge International
Handbook on Narrative
and Life History seeks
to capture the range
and scope as well as
the considerable
complexity of the field
of narrative study and

life history work by situating these fields of study within the historical and contemporary context.

Topics covered include:

- The historical emergences of life history and narrative study
- Techniques for conducting life history and narrative study
- Identity and politics
- Generational history
- Social and psycho-social approaches to narrative history

With chapters from expert contributors, this volume will prove a comprehensive and authoritative resource to students, researchers and educators interested in narrative theory, analysis and interpretation.

REVIEW OF

ENERGY MUTODI A LEVEL GEOGRAPHY

- It's so disappointing when a really interesting concept is ruined by horrible, cliché-ridden writing and cringe-worthy dialogue. Such is the case here. The novel starts strong but slides downhill quickly, devolving into a series of ever-more ridiculous scenes with, truly, some of the worst dialogue I've ever read. And without providing any spoilers, the final scene is unintentionally hilarious in its sheer awfulness. Seriously: read anything but this drivel.

- I was very entertained throughout the novel, however I do agree with the others

about the predictable ending. Still very good and worth your time.
