REVIEW OF BIOMARKERS OF NEUROLOGICAL AND PSYCHIATRIC DISEASE VOLUME 101 INTERNATIONAL REVIEW OF NEUROBIOLOGY

- I absolutely loved this memoir! Each "chapter" is very short so it's easy to read. Thomas explores her life through tiny snip-it chapters that seem like little memories pulled from a jar, which I find brilliant and completely refreshing. This memoir is so refreshing and like nothing you've read before. I read this before I

read *Three Dog Life* and am having a hard time reading it because I love this book so much. Not a word is wasted, this memoir is pure poetry to me.

- It is rare and hard to find a book like this. So emic, so true, so feminine. Through the simple stories of her life as a child, Mernissi shows us the falseness of Western stereotypes and the tragedy of Islamic sexism. She shows us what a true harem is- the pure companionship of women, and not the sexual lasciviousness which the Western imagination dreamed up in it's ideal of the exotic- in the process revealing far more the degradation of Western society

than they anything true of Arabic culture. But she writes with great honesty about her own people as well, and the control that a woman is constantly placed under, perceived as the "devouring vagina" (as she writes in another work, *Beyond the Veil*), needing to be controlled and put into it's place for the protection of men. One sees here, not through telling, but through story, how Moroccan women have so little freedom to be who they desire in a world where all that is public is also male. But we also see the beauty of women together in that same society, and through that, can dream.
