This book provides a concise yet comprehensive overview of computer and Internet security, suitable for a one-term introductory course for junior/senior undergrad or first-year graduate students. It is also suitable for self-study by anyone seeking a solid footing in security - including software developers and computing professionals, technical managers and government staff. An overriding focus is on brevity, without sacrificing breadth of core topics or technical detail within them. The aim is to enable a broad understanding in roughly 350 pages. Further prioritization is supported by designating as optional selected content within this. Fundamental academic concepts are reinforced by specifics and examples, and related to applied problems and real-world incidents. The first chapter provides a gentle overview and 20 design principles for security. The ten chapters that follow provide a framework for understanding computer and Internet security. They regularly refer back to the principles, with supporting examples. These principles are the conceptual counterparts of security-related error patterns that have been recurring in software and system designs for over 50 years. The book is "elementary" in that it assumes no background in security, but unlike "soft" high-level texts it does not avoid low-level details, instead it selectively dives into fine points for exemplary topics to concretely illustrate concepts and principles. The book is rigorous in the sense of being technically sound, but avoids both mathematical proofs and lengthy source-code examples that typically make books inaccessible to general audiences. Knowledge of elementary operating system and networking concepts is helpful, but review sections summarize the essential background. For graduate students, inline exercises and supplemental references provided in per-chapter endnotes provide a bridge to further topics and a springboard to the research literature; for those in industry and government, pointers are provided to helpful surveys and relevant standards, e.g., documents from the Internet Engineering Task Force (IETF), and the U.S. National Institute of Standards and Technology.

REVIEW OF BRO AN OPEN SOURCE NETWORK INTRUSION DETECTION SYSTEM

- The Scarlet Letter was effective in achieving its purpose of portraying the downsides of Puritan society and values through keeping readers entertained with a captivating plot. The author wrote about Hester and Pearl in a way that helped them attain emotional sentiment from the readers. Also, Hawthorne showed the physical and psychological effects of having a guilty conscience by writing about what Hester and Dimmesdale had to endure to hide their sin. The author also successfully showed the hypocritical aspects of Puritan society in Boston, Massachusetts during the mid-seventeenth century. For example, Dimmesdale still remained a religious minister and role model for the rest of the townspeople even though he was responsible for a forbidden affair with Hester. A main purpose of The Scarlet Letter was to show that human beings can be misunderstood if they aren't allowed to have personal identities due to strict societal regulations. In this novel, the author, Hawthorne, portrayed the idea that Puritanism often lead to unjustified punishment, sometimes against the wrong person. Throughout the novel, he draws strong criticisms against Puritan values. The Scarlet Letter was ineffective in achieving its purpose of satisfying readers because it did not come to a significant conclusion at the end and some of the main characters didn't receive enough focus. The author could have more effectively showed how Pearl shaped her later adult life by stating more information throughout the novel about her early life experiences. This addition would have significantly improved the novel because Pearl was a significant character that deserved a stronger focus. At the end of the novel, none of the characters surfaced as a winner above the others. The Scarlet Letter would have been significantly better in achieving its purpose if the author had written more about Hester and Dimmesdale at the end of the novel. Hawthorne didn't write in detail about their time together at the end of the novel. Instead, the characters died rather quickly and readers didn't get a chance to delve further into their lives to see if they could live happily after overcoming the ordeal of their sins. The Scarlet Letter is a well-known classic American piece of literature. Hawthorne effectively conveyed to readers the downsides of Puritan society during the mid-seventeenth century and values through expressing the hardships characters such as Hester, Dimmesdale, and Pearl had to endure due to the society and time that they lived in. However, the novel was ineffective because it didn't achieve its purpose of satisfying readers. The ending of the novel seemed rushed and didn't show or symbolize enough. Also, some of the main characters, such as Pearl, Hester, and Dimmesdale, deserved more credit in order to further exemplify their significance and everything that they symbolized throughout the novel.

- Jack Higgins a.k.a Granny's favourite. His world war 2 novels were very well written, with good plots. However, these latest Higgins novels lack something which the early Higgins novels had in abundance. They were obviously written by a person with a high command of the English language. His latest books have been somewhat lacluster in the way they are written. He seems to have cast aside the need to write well in favour of high powered plots. Lucky for him it works. Many authors couldn't get away with letting their writing get slack. But with Higgins, we just don't seem to care. And Why? Because his plots are so damn good. He writes to a very old formula of action novels. There is a flawed but brilliant hero, and a girl, and a formidable enemy. throw in different world location, lots of guns, lots of fighting, and simmer for 15 minutes. It is a very simple formula, and one which he never strays from. Some people criticise him because they believe this shows a lack of depth and range. In some ways they are right, but in others wrong. It is really great how he can just put pen to paper, no matter what he writes, and just make you want to turn the page. Also, it astounds me how he manages to come up with so many differney and exciting ideas which still manage to satisfy his writing formula. it is simple yet effective. This latest book is no less a pageturner than several of his previous ones. He has a great plot here, and a great, and very popular lead character, and one of the best baddies in a long time. extract from blurb: "When Paul Rashid, leader of the Rashid Bedouin of Hazar in the Persian Gulf, uncovers an international conspiracy to deprive his family of the oil wealth that is theirs by right, he vows to gain vengeance. The man sent to stop him is the British Government's uncompromising sevet enforcer Sean Dillon. It is a mission that will test him as never before, confronted by old foes and new in a deadly game of cat and mouse that will take him from Ireland to the USA, and from the heart of the English countryside to the deserts of the Hazar...and the very edge of danger." This in itself promises a brilliant an exciting book. Especially with such motives of the villain, who the reader empathises with right from the very beginning, hoping against hope that he does in fact gain his vengeance. It's a strange device Higgins uses here, because the reader knows they are not supposed to want the villain to win. But in this book you just can't help it. You feel so much sympathy with the fact with the fact taht Russia and America are trying to take away their families land and oil. You will him on, to win. And you, for once, wish Sean Dillion would fail. It's a book that really toys with your emotions. Because the characters are so compelling, and the plot so great, it more than covers up for the fact that they are not actually very much more than card-board cut outs. He doesn't draw his characters in any depth, but you just dont care. I got through this book in a single day. It's excellent. It starts with a bang (when a gypsy insults Paul rashid's mother and abuses, whereupon Paul goes to the gypsy camp to have it out with the man, and ends up cutting his ear off). and does not let up from there. Higgins writes excellent plot-driven thrillers. As well as being able to be very tender with his writing. There are times when you want to cry (rather like with his previous book "The President's Daughter"). Another good thing about this book is Paul Rashid's sister, Lady Kate Rashid. She's superb. A wonderfully strong willed young woman, who vows vengeance upon Sean Dillion right at the end of the book. I cannot wait for the sequel. Kate Rashid pitted against Dillion, will be an absolutely wonderful read. This book comes highly recommended, with a stunning plot and compelling characters. You should definitely give it a try if you like quick, exciting reads. But if you think that half the beauty of a book is in the writing, then it probably isn't for you. great. can't wait for Midnight Runner
