## **REVIEW OF PHYSICS A CONCEPTUAL WORLDVIEW 7TH EDITION**

• I enjoy historical fictions, so I knew "Fahrenheit 451" was not my style, but I thought I would give it a go anyway. Well, I hated it. I did not like Ray Bradbury's style and I think he needs help! Who in their right mind would think of our world becoming so controlling and horrible? There are a lot of unanswered questions and undefined terms in this book, so you better get the Cliff's Notes, because without them, you'll be lost. Do not be surprised if you do not finish this book quickly, either! I did find the subject of book banning and censorship interesting, but I think it could have been told differently. I do not recommend this book!

• This 1999 German book, translated into English in 2000, is well balanced between informative text and wonderful art. It is illustrated with very nice black and white photographs and color drawings. Each ship covered is illustrated with a side profile - I'm not certain, but each of these profiles looks like it is drawn to scale with all the others in the book, which visually shows how the shipbuilder's art has progressed over the years. Accompanying each profile for each ship is a specification of the ship and a brief career history. Note however, that the book is MUCH more than these little profiles - I just found them to be a nice added touch, just like I found the photographs of each man responsible for each ship's construction. The chapters are broken into intelligent historical periods and the text and illustration captions are informative and smart. The book conveys the pride that the people (and governments!) associated with these vessels had for their ships. As the author states, the Blue Riband was never a formal competition. As a consequence, there never was an official history kept about it. However, this book does an excellent job of filling that void.
