REVIEW OF MACHINE VISION ALGORITHMS AND APPLICATIONS

- McCullers certainly has a way with words; the writing is beautiful. The story is more driven by characters than by plot and there is no doubt that it is a sad, slow story where race, politics, and poverty converge. My disappointment is not with the book itself, but with its placement on the The Publishing Triangle's list of 100 best lesbian and gay novels. Modern readers expecting gay/lesbian content will be disappointed. It is possible to construe Singer's behavior as motivated by same-sex affection, but that is the only portion of the story with a gay subtext; many readers may not even read Singer as gay. Granted, at the time the novel was written, gay content was often coded, but there are other novels from the same period with much clearer gay/lesbian content. While it appears McCullers had feelings for another woman that does not qualify her works as gay/lesbian "novels"; perhaps a list of gay/lesbian novelists is a more appropriate place for McCullers works

- The novel *The Heart Is A Lonely Hunter* shows how different people struggle with life. John Singer is unable to communicate with people because he is a deaf-mute and he cannot speak . Mick Kelly does not speak to her family because they do not share the intelligence and ambition she has . Biff Brannon is left alone after his wife dies . Dr. Copeland separated from his family and other black people because of his education and way of life . Jake Blount is a newcomer in town and is mostly always alone . I really didn't like the book . The reason I didn't like the story is because it was too confusing . In the beginning the story is a little boring . I didn't like the ending because it was too sad . I also thought the characters were unrealistic. I don't think this would ever happen in real life. I gave *The Heart Is A Lonely Hunter* three stars because overall it was a ok book ,but not a really good one . I would not recommend this book because it is not that interesting.
