REVIEW OF CHAPTER 11 AGRICULTURE AND WATER QUALITY

- I first picked up this book at a friend's house. Our family stayed the night and forgot to pack books to read to our children. The hostess left this treasure on the night stand and I couldn't put it down. It is so beautifully worded and illustrated. I had to order it as soon as we got back. It seems as though many have forgotten that when we get back to the basics, life is much more simple. I found this book to be charming in every way.

- Ms. Lowry shows her best in this book. It is about a boy Jonas, who becomes The Receiver of Memory. When I say this book says everything it says everything. For example: 1. You may not choose your own mate. Why? Because of gender issues. No boy+boy or girl+girl relationships. 2. Only Birth Mothers can bear children. Why? So mothers won't have to feel the loss of children. 3. No color. Why? The only solution to racism. Read the book, and you'll realize how good it is!
