## REVIEW OF 40HP 2 STROKE ENGINE DIAGRAM

- Part of the appeal of this sort of book, books like '1984' or 'Brave New World' is that we can look at them retrospectively. Written mostly in the earlier part of the last century, they predicted just what sort of messes we would have created for ourselves in the next. The ideas their authors came up with were always just possible; in many cases some of the things the authors dreamed up came true, or almost so. It's chilling to consider that these books were written as 'worst case scenarios' of the time in which we now live. So it is with Fahrenheit 451 - much of the appeal of this book is it's consideration of just how far the TV craze would go, and how dumbed down the western world would become. The book is set not very far into our future, possibly this decade - how close are we to the sort of censorship Bradbury imagined? How much has our sense of community disappeared? How dumb are we? The interest for me, lay in these questions. I wouldn't consider 'Fahrenheit 451' great literature. I didn't think the writing was particularly skillful, or the plot incredibly suspenseful. But the

ideas Bradbury writes about make this book great. It really is one of those modern classics you should bother to read, especially if you enjoy Dystopian fiction like 'The Handmaid's Tale', 'Brave New world', or '1984)' or science fiction of any sort. Another one that, although it may seem like light reading or pulp as you are reading it, will stay with you for a good few days after you've put it aside and moved onto the next book.....

- Fahrenheit gives me a new appreciation of future based plots, it tells of a futuristic world where people have no love of art or creativity, and their lives consist mostly of TV viewing and speeding. Guy Montag, is a firefighter in this strange world, and instead of putting out fires, his job is to start them and to burn all books because they are not wanted because of how they make people think and consider things. This puts us in a place of a heartless society that is, in many ways, like our modern day society. The book is written in an eerie manner that makes you feel uncomfortable about the art deprived world that is being portrayed from the book, which is entirely a good thing. When Montag comes to realize that the world he lives in and the world he has been destroying could be a great place, he decides to stop his work and attempt to create a better world. He finds himself heading through a well detailed journey to create a world with free spirits rather than ignorant drones. The writing of the book is not cryptic however it still has a lost and ghostly feel to it, that really makes you think about our modern day society. For a book written in the 1950's, the idea still applies to today and how our society is in ways heading towards the deprived society that is portrayed in Fahrenheit 451. Bradbury creates a

timeless point of how reading, art, and nature are the most important elements of someone's life.
