[China Goes Green](#) Running Press Kids

What does it mean for the future of the planet when one of the world's most durable authoritarian governance systems pursues "ecological civilization"? Despite its staggering pollution and colossal appetite for resources, China exemplifies a model of state-led environmentalism which concentrates decisive political, economic, and epistemic power under centralized leadership. On the face of it, China seems to embody hope for a radical new approach to environmental governance. In this thought-provoking book, Yifei Li and Judith Shapiro probe the concrete mechanisms of China's coercive environmentalism to show how 'going green' helps the state to further other agendas such as citizen surveillance and geopolitical influence. Through top-down initiatives, regulations, and campaigns to mitigate pollution and environmental degradation, the Chinese authorities also promote control over the behavior of individuals and enterprises, pacification of borderlands, and expansion of Chinese power and influence along the Belt and Road and even into the global commons. Given the limited time that remains to mitigate climate change and protect millions of species from extinction, we need to consider whether a green authoritarianism can show us the way. This book explores both its promises and risks.

Numerical Prediction of Flow, Heat Transfer, Turbulence and Combustion: Selected Works of Professor D. Brian Spalding focuses on the many contributions of Professor Spalding on thermodynamics. This compilation of his works is done to honor the professor on the occasion of his 60th birthday. Relatively, the works contained in this book are selected to highlight the genius of Professor Spalding in this field of interest. The book presents various research on combustion, heat transfer, turbulence, and flows. His thinking on separated flows paved the way for the multi-dimensional modeling of turbulence. Arguments on the universality of the models of turbulence and the problems that are associated with

combustion engineering are clarified. The text notes the importance of combustion science as well as the problems associated with it. Mathematical computations are also presented in determining turbulent flows in different environments, including on curved pipes, curved ducts, and rotating ducts. These calculations are presented to further strengthen the claims of Professor Spalding in this discipline. The book is a great find for those who are interested in studying thermodynamics.

This short story consists of approximately 6000 words. This ebook has been translated from Italian to English by Andrea Pakieser.

REVIEW OF RTA NUMERIQUE FORD FIESTA FUSION GALERIE CREATION

- I was introduced to this novel after I had seen the movie Braveheart, Brian Boru would kick Wallaces' a**. Everyone should continue reading the works of Morgan Llywelyn, she creates a vision in your imagination you cannot find in a movie.

- The fire, the passion, the gentleness and the ferocity of this book is truly remarkable. It is a treat to the mind, one that develops the verdant landscape of those days, but yet gives hope for the future. If once a King such as Brian Boru could unite Ireland, then surely it can be done again. A man of his talents, finesse and courage will appear again and understand how history plays such an important role, and possibly take lessons from Brian's own life, superbly done by Morgan Llywelyn.
