Improve YOUR world. Dean Karlan and Jonathan Morduch's Macroeconomics 3e is built around the central concept that economics is a powerful and positive tool that students can use right now to improve their world. Macroeconomics uses examples and issues that resonate with students' experience to draw them in and frame ideas to help develop their economic intuition. - Using a balanced approach, students are able to sharpen their own understanding of topics by focusing on the data and evidence behind the effects they see. Students are equipped to understand and respond to real-life situations thought their new economic lens and challenged to decided how they will improve their world. -The third edition delivers core economic concepts along with exciting new ideas in economic thought and strives to keep students engaged by confronting issues that are important in the world. - This text combines a familiar curriculum with material from new research and applied areas such as finance, behavioral economics, and the political economy. Students and faculty will find content that breaks down barriers between what takes place in the classroom and what happens in our nation and our world, with applications that are driven by empirical evidence, data, and research. - Karlan and Morduch show students that economics is a tool to improve one's own life and promote better public and business policies in the world. At the same time, this third edition challenges students to reach their own conclusions about how they will improve their world.

A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

Education is a source of national pride in Lebanon. When the general public was asked how the education system was performing, 76 percent of respondents had a positive opinion; and these satisfaction rates have been consistently high over the years. However, perception of education quality does not reflect the reality of the sector; and learning outcomes, which are the determining metrics of success in education, have been lower than the international average, with a declining trend since 2007. This volume seeks to uncover why the education system in Lebanon is not reaching its full potential. It uses a political economy approach to study the drivers and factors that guide education operations to produce and utilize education outcomes. This includes the study of context, stakeholders, and processes that shape education policies, institutions, and activities. It also aims to identify enablers of and constraints on policy change and implementation, as well as the achievement of results. In this context, the analysis encompasses how education policies are developed; how education consumables—such as curricula, textbooks, and learning materials—are produced, distributed, and used by learners; how education services are delivered and monitored; and how achieved results are measured. It includes the identification of the most influential actors in the education arena, as well as their vested interests. It also examines unfavorable frameworks for action that are likely to block the adoption of reforms and delay or derail their implementation. The system-level analysis presented in this volume used a mixed-method approach. Qualitative and quantitative analyses were conducted based on a review and analysis of more than 1,900 research papers, articles, and books; laws and policies; expenditures; trends; and enrollment and outcome indicators. Primary methods of inquiry were also used and included interviews, focus group discussions, and a household-based perception survey.

Human well-being relies critically on ecosystem services provided by nature. Examples include water and air quality regulation, nutrient cycling and decomposition, plant pollination and flood control, all of which are dependent on biodiversity. They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system, so their loss is often not detected and continues unaddressed and unabated. This in turn not only impacts human well-being, but also seriously undermines the sustainability of the economic system. It is against this

background that TEEB: The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues. This book, written by a team of international experts, represents the scientific state of the art, providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity, and showing how these can be mainstreamed into public policies. This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade.

## REVIEW OF MACROECONOMICS MCCONNELL 18TH EDITION STUDY

- Mr. Gray does a nice lite job on breezing through Image Styler. JS is why I went there but found some rather cool insights into the cutting edge of graphics, the web and Adobe.

- This is a sequel to Mara and Dann, Doris Lessing's 2002 adventure story about a brother and sister trying to survive in a world where weather rules--and there's a lot of it. As is said of so many sequels, you don't need to have read the first book to get the second-- to simply follow and understand the story, that is. On a deeper level, the reader who hasn't read Mara and Dann, won't get much more out of this story than just that: a story. I'll go even further--without having read at least some of Lessing's voluminous works, I have a feeling this book will seem mighty thin. Themes and philosophies Lessing has been exploring almost obsessively for fifty years are merely touched on here, and it's possible the virgin Lessing reader won't even recognize them sailing by. I'm referring to Lessing's preoccupation with consciousness: individual versus collective consciousness; the evolution of human consciousness (past, present and future); animal and even alien consciousness. She's also still fretting about all the waste and destruction of "what we've been landed with" (see *The Four Gated City*). Now she's particularly aggrieved over what we've done to the planet with which we've been landed. Compared to the nonstop perils that Mara and Dann constantly struggled against, not that much happens in the sequel, other than the interactions between the characters. The most interesting of these is the relationship between Dann and Ruff, the snow dog he rescues from drowning as a pup. Lessing has written much about cats, but this is her first foray into dog consciousness. She is rarely sentimental, and makes no exception here--yet I defy readers to remain dry-eyed during certain passages involving Ruff. Little did I know when I picked up *A Proper Marriage* nearly 35 years ago that I was being introduced to an author whose work would stimulate and nourish me for a lifetime. While this may not be my favorite of her work, I hope nothing I've said will dissuade anyone from reading it, or any of her other more than thirty books.
