REVIEW OF CORRELATING EVENTS WITH TIME SERIES FOR INCIDENT DIAGNOSIS

• Look- this book is about ideas, not formulas. I just made an appointment with a Fidelity advisor and I'm motivated. Fidelity is going to be my "mother ship" in 10 years and I'm driving 2 hours to meet with a field office. The author gave me the idea after his comical discussion on retirement. Also, he brings the humanity into the equation. Thank God somebody has the huevos to bring up the fine points of where we really want to be after slaving for an employer . Living in a planned community is fine for some, but would be purgatory for me and he "gets it". Thanks Lee- I'm going to pass this book on to one of my buddies.

• The first time I set eyes on this book was in 1999, as a suggestion from a professor of my Masters. I studied the political propaganda in Brazil's Estado Novo, a dictatorship that controlled the country from 1937 to 1945. So this book was an actual breakthrough: for the first time I got a work that explained exactly what I wanted to know. It is, basically, divided in two parts: the first half is dedicated to Chakotin's experiences and theories about Pavlov's conditional reflexes; much of it may not interest historians (I'm one of them) or be considered yesterday's news; although, it's fundamental to understand author's ideas. The second half is devoted to the practical observations of his paradigm, understanding the political phenomenons of the Twentieth Century using the theory he'd explained before. This section dissects efficiently those mechanisms and details that are able to lead a political regime to victory or debacle. A little story to highlight the impact of such ideas: in Brazil his first, and unique, edition was in 1963; a year after a military coup took place, and Chakotin simply disappeared from book shelves and libraries: it was too dangerous for those leaders to keep this great book among the people.
