- Key Points/Program Differentiators

Program Overview The Interactive Science Activities workbooks are designed for the home environment, and modified from the lengthy lab manuals used in schools. They are custom designed at-home activities for students and parents to use on their own or with the Interactive Science grade-level bundles. The Pearson at Home Interactive Science Activities workbooks provide children with a student-centered approach to scientific discovery. Each hands-on activity presents a child with a challenging question that can be investigated and explored independently or with parent guidance. As part of the directed inquiry process, the child

will answer this question by exploring the resources, following the outlined procedures of each activity, collecting data, and drawing conclusions. In some instances, parents might need to help children with certain parts of the activity. Following the directed inquiry, the child will be given an opportunity to expand and demonstrate scientific reasoning by modifying the investigation and designing his or her own experiments to illustrate the concept. Utilizing these activities will encourage every child to think like a scientist and encourage him or her to be inquisitive. This curriculum has been modified specifically for homeschool families. At times, there may be references to print or digital components that are not included within the homeschool bundle. This will not hinder your child's successful completion of the course.

REVIEW OF EXPLORING SCIENCE 8 PEARSON EDUCATION 8G ANSWERS

- This is the fourth of Lee Child's Jack Reacher novels. It's a difficult book to review for me because I thoroughly enjoy the characters, the fast paced plot, and the intrigues. As an action/mystery novel this is an outstanding book. I could barely

put it down. I've really enjoyed each of Child's novels. Here we find Reacher getting himself into trouble once again by being in the wrong place at the wrong time and winding up smack in the middle of the hunt for a serial killer. There are many plot twists and some great false foreshadowing. The end caught me completely by surprise. Child fooled me and had me going down the wrong path of who the killer really was. The huge downturn is that the plot and set up is so farfetched and so unbelievable that it really ruined my suspension of disbelief. Granted, this sounds a little odd since most novels of this genre, including previous books in this series, have some pretty outlandish unbelievable plots. However, here Child paints an FBI that takes corruption to a level that only the most hard core conspiracy theorist could ever swallow. I think police organizations in this country, including the FBI are morally bankrupt and corrupt -- but Child goes beyond

that to fantasy. What's worse is that even if the FBI is as corrupt as what they are painted to be in the novel -- the motive of the FBI officers in this case make no sense whatsoever. In short, the setup is absurd on the grounds of logic, if nothing else. He could have written a better novel had he not take such an approach. Thus, yes I enjoyed the book -- but at the same time am irritated by it and give it poor rating.

- As usual, Lee Child creates a very interesting and thrilling story about the "hero" Jack Reacher. This story is in the time before he took to the roads, roaming around in the States. He is living in New York, dating the love of his life and an unfortunate involvement in a restaurant owners trouble with the maffia, Reacher gets accused of murdering woman he has known as an MP in the army. It's very good, but some parts can get a little bit boring. Still, from me it get's 4 stars! Hard to put down!
