REVIEW OF 2001 SUBARU FORESTER SERVICE MANUAL

- Twenty years ago I had to read Fahrenheit 451 as part of my required reading in the ninth grade. At the time reading wasn't my "thing". But for some reason, the book never left me, even though I could never remember why. Nothing about the book stayed with me, just the title. Now twenty years later, I have reread Fahrenheit 451 and know, without a doubt, why the book stayed with me. Imagine a world where books are burned. A world where firemen no longer come to the rescue to put out fires but come to burn your house down if you are caught with books. They no longer wield water hoses, but

flamethrowers. That is the world that Guy Montag lives in. He is a fireman, and for years he's rejoiced in the destruction that his flamethrower produces, burning the hated nonsensical books of the past. And you know what the ironic thing about that is, books are illegal, yet not because of our government, oh no, because the citizens of our country made it so! It was the peoples choice to turn their backs on books. Life is not happy when you can think and criticize, form opinions, argue points. It complicates things. So what do they do? They dispense with anything that will allow for that type of communication. But then one night after work as Montag is walking home he encounters a young girl, Clarisse. She is a strange one. But why is she strange? She is strange

because she actually talks and listens and looks and observes the things around her. And Montag is fascinated by that quality. He begins to question his job, his life. And then to further tempt his questioning curiosity about books and the reason they are so hated, a job comes in. Another burning is to be done. But this time the lady whose house is the next victim of the torch, sets herself on fire along with her books. She cannot bare to be witness to the destruction and still live. But before the bonfire begins, Montag secretly snatches one of her books. Disturbed and unstable, Montag goes home and we learn that that is not the first book that Montag has lifted from a burn site. He has collected many books over the last year, secretly wanting to learn what the big deal is about reading

and books. His life is not happy like it is supposed to be. Everyone is supposed to be happy without books. Without needing to think, to question, to wonder. He wonders what life was like before life became "simple". But in reality, the simplicity of life is not the outcome from life without books. With murders and suicides and violence and life at high speed, life is very much complicated. People have only brainwashed themselves into thinking that life is simple and happy, because they no longer think for themselves. I read this book just in time for banned book week. I find it very interesting the reasons people choose to ban this book or that book. Religious content, political views, profanity, nudity, sexually explicit, homosexuality. And you know what I

gather from those reasons, the people making the fuss are simply insecure individuals. Each one of those reasons are part of our everyday life. If you are secure in who you are, then you would not feel threatened by its content. But you know, this whole thing with banning books due to content actually promotes the non-thinking, non-opinionated aspects of the society in Fahrenheit 451 from happening. When a book is banned or is labeled controversial, it makes people wonder. It piques curiosity to learn what is within those pages that someone finds offensive. Take The DaVinci Code for instance. 80 million copies sold in 6 years! 80 million! That is a staggering number, especially in the short amount of time it's been in print. Now if you took away the controversy,

and no one made a fuss, how many copies do you think would have sold? I doubt that many! So I say fuss over books, it brings them to light to some one who may not have known about it otherwise. It promotes critical thinking, opinions, and who are we without our opinions and thoughts? I don't agree with banning books, just because the content is written down doesn't mean it's going to become part of society, because you know what, it already is! So who cares if it's written. People do do drugs. People do have sex. People do say bad words. People are homosexual. And yes, people do have different religious beliefs. Just because you ban a book, doesn't make those things go away. We are individuals. We are who we are. And no one should be able to

take that away by saying we cannot write this or that.

- Fahrenheit 451 is a portrait of civilization in collapse. Bruno Bettelheim once gave a lecture in which he said that modern mass-society displays a manic and unhealthy preoccupation with speed and motion, and that this preoccupation betrays the inner emptiness of "a hollow man". "Instead of asking where we are [inwardly] we just jump into the car and say, 'Let's get going'." Like Mike Judge's satiric film Idiocracy, Ray Bradbury's novel Fahrenheit 451 develops the idea of a fallen modernity to its logical conclusion. But unlike Idiocracy, Fahrenheit 451 is no satire. It is serious social criticism without a glimmer of humor. Bradbury's fictional world is a fascist state built on what NeoCon Philip

Zelikow calls "public presumption", "public myth" --- shared ideas assumed to be true but not known to be true. In other words, reality is what a government says it is. Bradbury's fictional world shares much, therefore, in common with George Orwell's novel 1984. The plot is built around the awakening conscience of a government employee, a firefighter who has always accepted public presumption as truth. The awakening is not pretty. Guy Montag, the protagonist, begins to

question his culture: Mindless entertainment, disrespect for life, constant motion. In Guy Montag's culture, the public presumption is that books are a potential terrorist threat. The job of firefighters, therefore, is to seek out and burn books. Given recent developments in US politics and society, Fahrenheit 451 --- like Orwell's 1984 --- has become more trenchant with each passing year. Bradbury explores the longterm moral and social implications of our present Zeitgeist.
