REVIEW OF ESSENTIALS OF PSYCHOLOGY 5TH EDITION

• Wow! The contributions to this anthology are breathtaking and thought-provoking. Travis Hunter makes a solid impression with his contribution -- a touching and honest family-type story that keeps it real, and provides a future and a hope. Tanya Marie Lewis paints a vivid description of prison and a certain shocking way that a man seeking forgiveness breaks out, and Margaret Johnson-Hodge plants hope inside those who might be ready to give up. This anthology is filled with strong and important writings; it's a must-have and should be added to your book collection pronto!

• This account of beginning her semi-retirement, told with candor and vulnerability, wonderfully illustrates how the personal becomes universal. Who doesn't have an identity centered around what they do, think, and know? More than a flash of recognition in the mirror, Caught in the Act is an invitation to explore your own boundaries and to step out beyond them. Best of all, the challenge is to step out playfully, to keep a sense of humor about how our conditioning limits us. How to enjoy life just as it is now, while being open to seeing more than we think we already understand. This is no instructional manual of advice, thankfully, instead it is a book about learning to surrender. An informed and well-grounded wisdom shines forth on every page. While the stories from her life give the reader a sense of connection to her, somehow the book magically becomes about you. Her questions become your questions, too. She writes unpretentiously, as one who finds it unnecessary to state the obvious. It is tempting to credit her decades as a book editor for the clarity of her writing, but the ability to turn a rigorous, analytical mind back on itself requires a degree of personal honesty that only comes with years of spiritual practice and contemplation. This is what makes her insight so recognizably human and relevant. It takes both humility and courage to first see, and then reveal oneself so forthrightly. It is easy for anyone to relate to the challenges of losing your identity with one's work and filling free time creatively; you needn't wait for retirement to explore the territory of "doing non-doing" or to face the inner critic that turns play into more work. Learning to live at ease in the "don't know" zone sounds like the advice of many a Zen master. To watch how someone really applies these teachings to their own life is a wonderful opportunity. Trips to Japanese Zen monasteries, classes in Chinese brush painting, and retreats with Dzogchen masters are fascinating enough just as stories, the inner life evoked by them contains observations you may find useful in any circumstances. I found myself saying "Oh, I do that, too" a hundred times over, as would anyone paying attention to the mind's usual antics. Her focus on the many ways we avoid being present shows (with the usual irony) how awareness of doing that immediately puts us in touch and makes us present in a deeper way. Sometimes just seeing how plain silly we can be might jolt us into whatever is real for us now. Never mind that she calls herself an "almost-Buddhist", her grasp of the issues centered around "aimless aim" is right up there with Zen and the Art of Archery. If we don't have any goals or intentions with whatever activity we are doing, we may go nowhere. Yet if we are too focused on results, we burden our actions with heavy expectations. This book is about finding that balance in your daily life.
