The Big Sick meets Dad is Fat in this funny and heartfelt New York Times bestselling memoir from writer, director, wife, and mother, Jeannie Gaffigan, as she reflects on the life-changing impact of her battle with a pear-sized brain tumor. In 2017, Jeannie's life came to a crashing halt when she was diagnosed with a life-threatening brain tumor. As the mother of 5 kids -- 6 if you include her husband -- sat in the neurosurgery department in star-covered sweats too whimsical for the seriousness of the situation, all she could think was "Am I going to die?" Thankfully, Jeannie and her family were able to survive their time of crisis, and now she is sharing her deeply personal journey through this miraculous story: the challenging conversations she had with her

children; how she came to terms with feeling powerless and ferociously crabby while bedridden and unable to eat for a month; and how she ultimately learned, re-learned and re-learned to be more present in life. With sincerity and hilarity, Jeannie invites you into her heart (and brain) during this trying time, emphasizing the importance of family, faith and humor as keys to her recovery and leading a more fulfilling life.

**The Red-Hot Book of Spanish Slang** McDougal Littell/Houghton Mifflin

REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But

schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

## REVIEW OF AVANCEMOS CUADERNO

## PRACTICA POR NIVELES 1 REVISED

- I have read her other 4 books in this series, and I fell in love with the characters and read with gusto! There is much detail, lots of in-depth explanations of life in that time - and I felt as if I were there with them - thru the exciting times she described! I truly hope she will write many more, using these characters, and others. I feel as if there are many more stories out there to be told about Ayala and Jondalar and their exciting lives with all the innovative things they were capable of devising! I wish the books had gone on and on - I hated for them to be over - and I await the next ones eagerly!

- I got interested in this series by accident. I rented 'The Mammoth Hunters' from an audio book rental place a few years ago. I listened to the book and I was hooked. I have purchased the entire series that Jean Auel has written so far. It is a 6 book series, but only 5 books have been written so far. This is the 5th. This book does not come up to the level of story telling that the previous books did.\* It is important to read the previous 4 books to understand some of the things mentioned in this book.\* The author has included more of the recent discoveries about cave society in her book at the expense of the story itself.\* Unlike previous books in this series, the author raises many questions in this book which she leaves unanswered.\* I feel that this book is not complete. It is only a prelude to the final book in this series. I felt that this book is worth buying. But only if you are a fan who has read the previous 4 books and are intending on buying the final book when it comes out.
