REVIEW OF ENGINEERING DRAWING BY VENUGOPAL

- The description of the book "illustrate them with 150 inspired examples" is very misleading. The author talked about 150 riffs.

You are supposed find the actual riff tabs somewhere else. After buying this book, you may need to buy another 100 books to find the 150 riffs the author discussed about. Skip this book.

- Used this book first weekend after I got it. Found trails I didn't know about. Easy to follow. A must for novices at off roading.
