According to Prof. D. Despommier, by the year 2050, nearly 80% of the earth's population will reside in urban centers. Furthermore, the human population will increase by about 3 billion people during the interim. New land will be needed to grow enough food to feed them. At present, throughout the world, over 80% of the land that is suitable for raising crops is in use. What can be done to avoid this impending disaster? One possible solution is indoor farming. However, not all crops can easily be moved in an indoor environment. Nevertheless, to secure the food supply, it is necessary to increase the automation level in agriculture significantly. This book intends to provide the reader with a comprehensive overview of the impact of the Fourth

Industrial Revolution and automation examples in agriculture.

REVIEW OF HANDBOOK OF PRECISION AGRICULTURE

- For those who don't want to spend years in Applied Linguistics classes (I used to teach the subject), who have read "What To Say When You Talk To Yourself," and who don't want to wade

through the philosophical mire of the Seth books and other similar pedantic tomes again, this little blue book is for you. In one hour the reader can learn, through easily read text and simple to remember graphics, the basics of how our beliefs create our thoughts, and in turn, how our thoughts create our experiences. Written in a modern, upbeat, non-metaphysical style, Mr. Doyle says what needs to be said without any gingerbread. The exercises are simple and incredibly enlightening. I passed this book around my circle of colleagues, and most said something to the effect of "I wish I were teaching THIS! It's about how to deal with oneself in the real world, which we all need to know before tackling chemistry or English or sports." I've read all the texts

and taught many, both good and not-so-good, and Mr. Doyle's "little" book is the best.

- I enjoyed this book very much. I will not get into the story of what the book is about because the reviews made before me has done the job remarkably well. Especially the fact that it is a true story. It seems to me that fiction has taken prominence over fact sometimes in this modern world that we can not discern which is which any more. We live in a world that sometimes cannot put things like this in their proper perspective. Folks, it did happen. If its not on the six o'clock news we think it never happen. Well, what is history for? Never the less it is a great read, unless of course you happen to be stranded on a island or on a life boat. Enjoy every morsel.
