REVIEW OF 5TH CLASS POWER ENGINEERING PRACTICE TEST

- The book is poorly written and edited. He never does get the name of the Viet Cong sniper rifle spelled right. The author without mentioning any names calls into question the actions of late Gunnery Sgt. Carlos N. Hathcock II. I wonder why he doesn't write another book calling into question the actions of Sgt. Alvin York or Lt. Audie Murphy. If you want to read a good book skip this one. I was let down by this one.

- This book falls far short of it's target. While Culbertson was an in-country player and is writing as part of this elite group, his style is very melodramatic and jingolistic. I've had to roll my eyes at John's many attempts to paint the 5th Marine Snipers as yah yah heroic types and the bad guys as the incarnate of evil. He gives some good info on rifles and ammo but continues to repeat this info throughout the book and I guess he needs to fill white space with this unnecessary additional information. The author comes across as a narrow-minded, stuck in the mud, stereotyping jarhead. He describes the Vietnamese as sneaky blah blah dirty Communists who were more likely trying to rid their country of the Americans as they had with the French, Japanese and Chinese. I find it distasteful to describe the 5th Marine Snipers as killers/murders who fought for the excitement of the hunt. If a human life and the sacrifice these people gave for their country is worth only 13 Cents, then the value of this book is far less. There are better books about those who fought but this is not one of them.
