## **REVIEW OF ANSI API STANDARD 607 SIXTH EDITION 2010 ISO 10497 2010**

- People today do not believe in magic, but one day a teenager, Nita, finds one of those So You Want to Be a... books but this one says So You Want to Be a Wizard. She can hardly believe it but that book would change her life forever. She finds herself talking to trees; finding new friends and meeting interdimensional beings. Her best friend is Kit a fellow

wizard who can talk to metal. Then they meet Fred, a white hole, who Kit and Nita accidentally summoned who helps them along the way while they try to discover the truth behind the "Starsnuffer", the "Dark power" that was kept silent until now. Do you think that I would give away the ending to you? You'll have to read it yourself to see the fate of Nita, Kit, and Fred.

- British scholar and Fellow of the Society of Antiquaries Robert Hutchinson offers up an eminently readable look at the horrifying, grotesque atmosphere of the court of Henry VIII during the years following the execution of Thomas Cromwell (1540). The King who is probably the single most famous and often depicted monarch in English history had, by the 1540s, degenerated

from an athletic, flamboyant king to a morbidly obese tyrant who struck terror into the hearts of even the most arrogant and jaded courtiers. During the final five years of his reign, the competent government that had operated effectively under such skilled managers as Wolsey and Cromwell, fell after their deaths into near bankruptcy with severe devaluation of coinage caused by rampant overspending on failed wars and internal corruption. Henry handed out rewards and murderous punishments as courtiers worked with nervous anticipation to establish their positions when the bloated, sick and increasingly unpredictable king should finally die. When he finally did die at age 55 in January 1547, Henry VIII was succeeded

by his son, nine year old Edward VI and the winning factions claimed elaborate titles and rewards while others were dispatched to the Tower. During this time, the English Reformation hovered between extreme visions of reform and reaction with some of the most horrific tortures and burnings designed to "save the souls" of the people and their dying monarch. Many of the winners of this deadly sweepstakes of greed and religious fanaticism ended up beheaded or burned as the wheel of fortune continued to turn murderously through the reigns of Edward VI (1547-53) and Mary Tudor ("Bloody Mary" 1553-1558)

to the accession of Elizabeth I in November 1558. This history book is anything but dry and uninteresting. Readers of Hillary Mantel's trilogy will certainly want to check this out. It casts clear and precise light on the fear and mismanagement that prevailed during the final years of Henry VIII. One doesn't generally think of Henry VIII as incompetent, but this book brings into clear focus how the physical and mental deterioration of an absolute monarch can create a massive governmental "train wreck" as underlings motivated by greed and fear scramble to rescue themselves.
