## REVIEW OF CASEWORKER PRACTICE CIVIL SERVICE EXAM

• Here's an inevitable but different take on the time travel story. It answers the question of where you would find other time travelers and what you would do when you found them. The

place to find time travelers is apparently at Jesus' crucifixion. And what you do when you find them is to form a league of time travelers who can hopefully make the future a better place. Never have I seen any other time travel author touch on these ideas, but they do seem like obvious ideas. This story was quite enjoyable and only took a couple of sittings to finish. The time travelers in this story have a genetic predisposition to time travel with their physical body instead of by using a time machine. Their period of time travel covers quite a large period of time from the crucifixion to ancient Rome to pre-Colombian America to 1970s America to the day of judgment and beyond. It covers themes of love and deception and also tries to answer the question of what the ultimate possibility could be for a time traveler. I definitely think this time travel novel is a sadly overlooked one that should have become more famous than it did. Poul Anderson wrote several other novels with time travel themes that I'd like to delve into soon

• Applied Economics policies merge the principles of economics with politics. The book by Thomas Sowell, *Applied Economics: thinking Beyond Stage One*, urges the reader to evaluate public policy beyond its hoped-for results. One needs to consider the incentives and constraints inherent in the application of a policy to understand its impact. Sowell explores topics in six categories: free and unfree labor, the economics of medical care, housing, discrimination, insurance, and the economic development of nations. He looks at public policy in these areas, and analyzes them in ways that people may not consider. Consider the case of public interest law firms, or ideological organizations and movements. These organizations present themselves as independent, unbiased intermediaries who perform a public service. Their crusade may be public safety: Sowell explores the case that Ralph Nader made against the Corvair in 'Unsafe at Any Speed,' but it could be about medication, pesticides, nuclear power, or any other issue. Nothing is 100% safe, but safety movements argue that something is categorically unsafe and it needs to be safer. Current safeguards are inadequate, and the public is insufficiently conscientious of it. The safety organizations themselves may be zealously conscientious, as their incentives are to induce as much fear as possible in order to collect the money needed to support themselves from lawsuits, donations, or taxes. Even though these movements may be with the best of intentions, third party advocates often insert themselves into potentially symbiotic deals by having their standards added to adequate products. Everybody remembers the case of the McDonalds cup of coffee. Some woman bought a cup of coffee and took it to her car, where she spilled some one herself, then sued the company for damages caused by scalding. She won her case, meaning that every other consumer pays for her carelessness in several ways: higher prices, safer tops for coffee cups, extensive warnings on the product, and even higher prices to pay for these externalities. Many people may welcome these changes, and not worry about the higher prices. Yet you'll always find some old-timer saying, "I used to get a cup of coffee for a quarter." "If it saves just one life, it's worth whatever it costs." Safety is an incremental decision, not a categorical one. There is a chance that we may sustain injury, or even die, in an automobile accident every time we get into a car, but we still do it to avoid the inconvenience of other modes of transit. Even pedestrians are at risk from operators of five-thousand pound missiles who are distracted with their cell phones and text messages. Lives would be saved by banning cars altogether, but at a terrible cost of inefficiency to society. You have to look at how much safer we will be in analyzing a public policy decision, while advocates tend to think of safety as something that is 'safe'

or 'unsafe.' Sowell provides numerous, provocative insights about a range of important public policy issues in this 222-page book. His style is a step below the popular Freakonomics books, but steps above the stilted prose of the average economist. One difference is that Steven Levitt employs a professional writer, Steven Dubner, to write his stories. Nevertheless, Thomas Sowell and the Freakonomics authors use similar modes of economic

thinking and similar ways of explaining them. The Freakonomics authors are better promoters than Thomas Sowell. They write about sexier topics and you can even make a movie about their books. While I enjoy both books, I still prefer Sowell. His topics are meatier and his findings are more relevant to public policy decisions.
