REVIEW OF DIETA MIMA DIGIUNO DR LONGO UN ESEMPIO E UNO SCHEMA

- This is the best Book in the Foundation sequence. It is grate, and once I started to read it, I couldn't stop. Read it!!! and you will become an Issac Asimov Fan like me.

- Foundation clearly deserved its awards and recognition for being a classic science fiction novel. The creative and unique story line presents the reader a sensation of the future. In the beginning of the book, Hari Seldon was introduced as a psychohistorian and mathematician who could chart the future of the human race for tens of thousands of years. He predicted a decline of the Galactic Empire, which had lasted for twelve thousand years, into a state of disorder and barbarism for the next thirty thousand years. Hari Seldon then established the Foundation to serve as the purpose of shortening the period of chaos into a single millennium or less. The book was extremely enjoyable and the pages went by fast. However, the only problem I had was that once I got to know the characters, the story went on to a situation a couple decades later with new characters. Though it bothered me, the way the author wrote his novel was necessary to put a whole century's plot into a book. Despite the many characters in the story, the author created a distinct personality for each. Yet, each of the leaders in the different parts of the book were similar in a way; they all dealt with conflict extremely calmly and ingeniously. They cleverly manipulated their enemies with their words and were always prepared against threats or opposition. They knew how to win the people's votes even when they were in a weak position to run for a government position. I could not help but to ponder about what I would have done in each of the situations. I would definitely recommend this book to anyone that likes science fiction or anyone who likes reading about how characters cleverly solve their problems.
