Regents Chemistry--Physical Setting Power Pack Revised Edition Cambridge University Press

This fully updated Ninth Edition of Steven and Susan Zumdahl's CHEMISTRY brings together the solid pedagogy, easy-to-use media, and interactive exercises that today's instructors need for their general chemistry course. Rather than focusing on rote memorization, CHEMISTRY uses a thoughtful approach built on problem-solving. For the Ninth Edition, the authors have added a new emphasis on critical systematic problem solving, new critical thinking questions, and new computer-based interactive examples to help students learn how to approach and solve chemical problems--to learn to think like chemists--so that they can apply the process of problem solving to all aspects of their lives. Students are provided with the tools to become critical thinkers: to ask questions, to apply rules and develop models, and to evaluate the outcome. In addition, Steven and Susan Zumdahl crafted ChemWork, an online program included in OWL Online Web Learning to support their approach, much as an instructor would offer support during office hours. ChemWork is just one of many study aids available with CHEMISTRY that

supports the hallmarks of the textbook--a strong emphasis on models, real world applications, visual learning, and independent problem solving. REVIEW OF TITRATION QUESTIONS AND

ANSWERS

- I really enjoyed the book. I like how it kept me on the edge of my feet, thinking about what was going to happen next. I liked how your characters Tom, Mary and Ben. They really made the book what it was. The think I really did not like was the way you ended the book. I wish you could have left me with an idea how Tom ended his life, but I do have a really good idea how it ended anyway. All in all I liked the book and cannot wait until your other one comes out.
- True genius at work here. Left me with some hope for this troubled world. A book everyone should own, no matter what your position is on the war on drugs.
