Seminar paper from the year 2017 in the subject English - Grammar, Style, Working Technique, grade: 100, , course: M.A. Course, language: English, abstract: This paper deals with the question "what is stylistics?" from a beginner's perspective that asks questions and tries to find answers. This paper discusses the two main types of stylistics and how each type deals with the literary text. It also displays the history of stylistics, how this method came into existence and its purpose and aims. At the end, it explains some of the key terms and devices used in stylistic analysis briefly, providing the definition for each device and term.

A Stylistic Analysis GRIN Verlag

Seminar paper from the year 2020 in the subject Literature - Africa, , language: English, abstract: This study aims at carrying out a stylistic analysis of selected short stories from Achebe's *Girls at War* and other stories. Stylistics, a combination of style and literature is a discipline which has been approached in different ways by different scholars both in linguistic studies and literary studies; it is a borderline discipline between linguistics and literature thus its definition varies based on the theory adopted. For better understanding, there is the need to explain what style is before defining the term stylistics. Style is got from the Latin word "Stilus" which means "a pointed instrument for writing on waxed tablets and has, in modern times, been associated with a way or manner of writing or speaking" (Otagburuagu et al 35). Style has also been defined as the description and analysis of the variability forms of linguistic items in actual language use. It is the manner or mode of expressing one's thought in language. A creative artist expresses his feeling, thought, ideas and vision through language and his unique way of using language to convey his feelings is what is called style (E.J. Otagburuagu et al 2014:35). Leech and Michael in E.J. Otagburuagu et al 2014 define style as "the linguistic characteristics of a particular text". According to Otagburuagu et al, Katie in her book, *A Dictionary of Stylistics* (1989) classifies style into the following: style as personal idiosyncrasy, style as a technique of expression and style as the highest achievement of literature. Stylistics has been defined as a study of the different styles that are present in either a given utterance or a written text or document. Stylistics is derived from the word style and it concerns itself with the study of the techniques and manner in which people express their thought both in speech and writing. Stylistics deals with a wide range of language varieties and styles that are possible in creating different texts, whether spoken or written, monologue or dialogue, formal or informal, scientific or religious etc. Stylistics unlike pragmatics that focuses on the "what" of a text, concerns itself with the "how" and "why" of a text. Leech, in line with this, defined stylistics as "a linguistic approach to literature; explaining the relation between language and artistic functions with motivating questions such as why and how more than what."

Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 3,0, University of Münster (Englisches Seminar), language: English, abstract: The task will be to examine the given extract in terms of style, narration and possible meaning emerging from the text and its mostly foregrounded elements. Further ambitions are to analyze how Gilman uses autobiographical elements for an implied authorship and to discuss the problem of interpretation. This question arises automatically, when dealing only with extracts from, therefore not complete, texts, and will be deepened in the concluding chapter: "Reconsideration".

In this book, Yufang Ho compares the text style difference between the two versions of John Fowles' *The Magus*, exemplifying the methodological principles and analytic practices of the corpus stylistic approach. *The Magus* was first published in 1966 and was revised and republished by Fowles in 1977. Fowles' own comment on the second edition was that it was 'rather more than a stylistic revision.' The book explores how the revised version is linguistically different from the original, especially in terms of point of view (re) representation. The corpus stylistic approach adopted combines qualitative and quantitative comparison to confirm the overall text style difference. The analysis demonstrates that computer assisted methods can identify significant linguistic features which literary critics have not noticed and provide a more detailed descriptive basis for literary interpretation of (either edition) of the novel. This analysis of *The Magus* serves as a case study and exemplar of how corpus techniques may be used generally in the study of linguistics.

In this concise and engaging analysis of rock music, music theorist Ken Stephenson explores the features that make this internationally popular music distinct from earlier music styles. The author offers a guided tour of rock music from the 1950s to the present, emphasizing the theoretical underpinnings of the style and, for the first time, systematically focusing not on rock music's history or sociology, but on the structural aspects of the music itself. What structures normally happen in rock music? What theoretical systems or models might best explain them? The book addresses these questions and more in chapters devoted to phrase rhythm, scales, key determination, cadences, harmonic palette and succession, and form. Each chapter provides richly detailed analyses of individual rock pieces from groups including Chicago; the Beatles; Emerson, Lake, and Palmer; Kansas; and others. Stephenson shows how rock music is stylistically unique, and he demonstrates how the features that make it distinct have tended to remain constant throughout the past half-century and within most substyles. For music students at the college level and for practicing rock musicians who desire a deeper understanding of their music, this book is an essential resource.

REVIEW OF A STYLISTIC ANALYSIS OF SOME SELECTED POEMS OF WOLE SOYINKA

• I really liked this book. I read it all in one night and read it again the next day because I was afraid I missed something.

• East of Eden is an epic, powerful book of hope, despair, suffering and permission for humanity to fulfill it's potential. This may sound dramatic but East of Eden is one of the most thoughtful books I have ever read. The level of depth that is so subtly put into the book has a profound impact on the reader: the idiosyncrasies of life, which we so often take for being individual to ourselves are really vividly shown to be universal. The book isn't so much a novel but a treatise on human nature and a philosophy for life. This is a big claim so I'll try and justify it. But really, this is a book that needs to be experienced rather than read so any review is only a shallow representation. It takes a novelist of

Steinbeck's skill to pull the deep philosophising off in a non-condensending or patronising manner. Yet, he handles the book beautifully, the philosophy comes from two very strong and intriguing characters, Samuel and Lee, both outsiders beloved by those close to them who are able to advise the other characters and, by proxy, the reader too. Through these characters' strong voices, the other actors are guided through their lives, the strength of hope that they give out is the difference between life and death for some characters. The ideas of the book are obvious when read but stay with the reader and offer a simple approach to a lives beset by complications - put simply, you may do what you want in life, you learn for yourself and although help and strength may be offered by other people, ultimately you are responsible for your own life. And for whether you are satisfied when death takes you. The book is strong in many areas, such as the depth of knowledge gained about American history and the American psyche, the deep love shown to its people and the strong,

interesting characters, shown extra love in their crafting because many are based on Steinbeck's own family. However the level of detail in the book slows down the narrative tremendously: this isn't a novel that can be rushed through without missing the crux of the book; the contemplative tone means that it will always be a slow read. The plot is also quite simplistic and easily predictable. It could be reduced to a few lines but in doing so the fine details and love that is so apparent in the book would be lost. The plot is secondary to the environment, characters and, above all, to the ideas of the book. If this type of book sounds intriguing to you, please buy or borrow it quickly, as it will be a book that you won't forget for a long time and offers the reader a lot. Despite the heaviness of the topics and some of the vindictiveness shown by some characters, the book leaves the reader in hope rather than despair by the end. Even if it doesn't sound appealing and the size of the book puts you off you should try this book. It is a rare masterpiece and one which will be as relevant in 100 years as it is now with much wisdom on offer to any reader, regardless of their world experiences.
