CUENTOS CHINOS ANDRES OPPENHEIMER SUMMARY: UNLOCK YOUR NEXT LITERARY EXPERIENCE WITH OUR CONCISE REVIEWS

Structures of Deceit Liturgical Press

La educación es algo demasiado importante...como para dejarla en manos de los gobiernos Periodista cardinal y siempre dispuesto a desafiar las modas políticas del momento con inteligencia y humor, Andrés Oppenheimer demuestra en este libro que mejorar sustancialmente la educación, la ciencia, la tecnología y la innovación no es tarea imposible. Pero sí tremendamente necesaria. La razón es simple: el XXI será el siglo de la economía del conocimiento. Contrariamente a lo que pregonan presidentes y líderes populistas latinoamericanos, los países que avanzan no son los que venden materias primas ni productos manufacturados básicos, sino los que producen bienes y servicios de mayor valor agregado. ¡Basta de historias! es un agudo viaje periodístico alrededor del mundo, que aporta ideas útiles para trabajar en la principal asignatura pendiente de nuestros países y la única que nos podrá sacar de la mediocridad económica e intelectual en la que vivimos: la educación. "Este libro sale a la luz en momentos en que buena parte de Latinoamérica está festejando el bicentenario de su independencia. La obsesión con el pasado es un fenómeno característico de la región. Curiosamente, no ocurre lo mismo en China, India y otros países asiáticos y de Europa del Este a pesar de que muchos de ellos tienen historias milenarias. Vale la pena entonces hacernos una serie de preguntas tan pertinentes como políticamente incorrectas: ¿es saludable esta obsesión con la historia? ¿Nos ayuda a prepararnos para el futuro? ¿O, por el contrario, nos distrae de la tarea cada vez más urgente de prepararnos para competir mejor en la economía del conocimiento del siglo XXI?" ENGLISH DESCRIPTION Education is a matter too important to leave it in the hands of the government. Key journalist and someone that is always ready to challenge political trends with intelligence and humor, Andrés Oppenheimer explains that substantially improving education, science, technology, and innovation is not an impossible task, but rather an extremely crucial one. The reason is simple: the 21st century will be one known for knowledge. Contrary to what Latin American populist presidents and leaders preach, the countries that advance the most are not those that sell raw materials or basic manufactured products, but rather those that produce goods and services with higher added value. Enough History! Is a piercing journalistic trip around the world in which Oppenheimer provides useful ideas on how to work on, and improve, the most important issue still pending in our countries, and the only one that can take us out of the economic and intellectual mediocrity in which we live: education. "Having an obsession with the past [in Latin America] is a distinctive to the region. Interestingly, the same is not true in China, India, or other Asian and Eastern European countries even though many of them have ancient

histories. It is worthwhile then, to ask ourselves questions that are relevant and even politically incorrect like: is this obsession with history healthy?"

From the world-renowned trendspotting duo who has predicted everything from metrosexuality to the growth of global brands comes a new, enlightening look at the future. Based on intensive research and interviews as well as the authors' real-world and business experience in locations across the globe, this book yields surprising conclusions about everything from work (the end of permanent full-time employment) to sex (disappearing gender boundaries) to business (the emergence of true one-to-one marketing and the birth of "Chindia"). Essential reading for managers, marketers, and just about everyone else.

The Zapatista Reader VINTAGE ESPAÑOL

With a surprising optimism about the future of Latin America, Andres Oppenheimer reveals in this book the keys to success in the twenty-first century, in which innovation and creativity are the pillars of progress. What should we do, as individuals and countries, to be more creative and thrive in the innovation economy? What should countries do to produce world-class innovators like Steve Jobs? To explore these questions, award-winning journalist Andres Oppenheimer went to Silicon Valley and other top innovation centers, and interviewed some of the world's most successful innovators. Among others, Oppenheimer tells the story of Pep Guardiola, the coach who led Barcelona's soccer team to its most glorious seasons; chef Gaston Acurio, who transformed Peruvian food into an engine of economic growth for his country; Bre Pettis, the U.S. entrepreneur who revolutionized the 3D printing industry; Salman Khan, the American teacher who created the ground-breaking Khan Academy free online education website, and Sir Richard Branson, the British music and airline tycoon whose Virgin Galactic company is venturing into the space tourism industry. From these personal stories, with his usual clarity and insightful style, Oppenheimer arrives at a series of specific conclusions on how to succeed in the knowledge economy and trigger a new wave of innovation across the world. Reviews: "Riveting... Oppenheimer's investigative skills are considerable and his story sense wonderful." -The Los Angeles Times- "A wonderfully subtle and informed account." -Newsday- "A fascinating story, rich with detail and painstakingly reported." -The Philadelphia Inquirer- "Oppenheimer was exhaustive in his research...His reporting is solid and engrossing." -Time- "Gripping....superb, highly recommended book." -San Diego Union Tribune- "Oppenheimer's book reads like a thriller." -Mario Vargas Llosa- "A spectacular job of reporting, investigating and observing." -Bob Woodward- "Oppenheimer occupies a unique space in the press of the Americas. His journalistic work sets the agenda of political debate" -Le Monde-

DEBATE

This book examines Taiwan's relations with Latin America and the US-China rivalry in the region. The author argues that Taiwan's future as an independent state hinges on the balance of power between the United States and China.

Manteniéndose fiel a su característico estilo periodístico, Andrés Oppenheimer lleva a sus lectores en un nuevo viaje, esta vez a través del mundo, con la intención de comprender cuál será el futuro de los trabajos de hoy en el día, mientras se aproxima lo que muchos han denominado como la era de la automatización. Tal como lo indican dos de los entrevistados de Oppenheimer -ambos expertos en tecnología y economía de la Universidad de Oxford- el cuarenta y siete por ciento de los trabajos existentes corren el riesgo de automatizarse o volverse obsoletos debido a los avances tecnológicos y el crecimiento de los productos y servicios en línea que están por venir en los próximos veinte años. Oppenheimer conversa con expertos en sus campos y examina los cambios que ya comienzan a desarrollarse en varias áreas de empleo, incluyendo en la industria de alimentos, en el mundo legal, en la banca y en la medicina. Oppenheimer contrapone también las perspectivas de los "tecno-optimistas" con las de los "tecno-negativistas" e intenta encontrar un término medio entre una visión alarmista del futuro y una que es demasiado acrítica. Autodenominado un "optimista cauteloso", Oppenheimer opina que la tecnología no necesariamente creará un desempleo masivo, sino más bien cambiará drásticamente la definición de lo que hoy conocemos como un "empleo".

Cuentos chinos Ediciones Felou, S.A. de C.V.

Staying true to his trademark journalistic approach, Andrés Oppenheimer takes his readers on yet another journey, this time across the globe, in a thought-provoking search to understand what the future holds for today's jobs in the foreseeable age of automation. *The Robots Are Coming!* centers around the issue of jobs and their future in the context of rapid automation and the growth of online products and services. As two of Oppenheimer's interviewees -- both experts in technology and economics from Oxford University -- indicate, forty-seven percent of existing jobs are at risk of becoming automated or rendered obsolete by other technological changes in the next twenty years. Oppenheimer examines current changes in several fields, including the food business, legal work, banking, and medicine, speaking with experts in the field, and citing articles and literature on automation in various areas of the workforce. He contrasts the perspectives of "techno-optimists" with those of "techno-negativists" and generally attempts to find a middle ground between an alarmist vision of the future, and one that is too uncritical. A self-described "cautious optimist", Oppenheimer believes that technology will not create massive unemployment, but rather will drastically change what work looks like.

RECOGNIZING CHARACTERS IN CUENTOS CHINOS ANDRES OPPENHEIMER

The School of Prayer Penguin

Con su habitual lucidez, Oppenheimer analiza la realidad actual y de los próximos años en América Latina, a la luz del ejemplo de los llamados países emergentes de los últimos años: China, Irlanda, Polonia, República Checa, entre otros. El autor busca descubrir quién presenta un panorama realista de los próximos veinte años y quién está contando "cuentos chinos". Sus conclusiones son reveladoras, ya que si bien los informes antes mencionados resultan acertados como diagnósticos del presente, el autor se muestra asombrado por la rapidez con que ciertos países de características previas muy similares a las nuestras pudieron pasar de la pobreza y la desesperanza a la riqueza y el dinamismo. Es, definitivamente, un libro para desactivar prejuicios.--Desde la descripción de la editorial.

From the author of *Serial Killers: The Method and Madness of Monsters* comes an in-depth examination of sexual serial killers throughout human history, how they evolved, and why we are drawn to their horrifying crimes. Before the term was coined in 1981, there were no "serial killers." There were only "monsters"--killers society first understood as werewolves, vampires, ghouls and witches or, later, Hitchcockian psychos. In *Sons of Cain*--a book that fills the gap between dry academic studies and sensationalized true crime--investigative historian Peter Vronsky examines our understanding of serial killing from its prehistoric anthropological evolutionary dimensions in the pre-civilization era (c. 15,000 BC) to today. Delving further back into human history and deeper into the human psyche than *Serial Killers*--Vronsky's 2004 book, which has been called the definitive history of serial murder--he focuses strictly on sexual serial killers: thrill killers who engage in murder, rape, torture, cannibalism and necrophilia, as opposed to for-profit serial killers, including hit men, or "political" serial killers, like terrorists or genocidal murderers. These sexual serial killers differ from all other serial killers in their motives and their foundations. They are uniquely human and--as popular culture has demonstrated--uniquely fascinating.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* "A dazzling history of Western ideas." —*The Economist* "Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase." —*Wall Street Journal* "[W]ritten with vitality and verve . . . a tour de force." —*Boston Globe* Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

Three modern, edgy and superb stories by famous Mexican author Mario Bellatin--*Chinese Checkers*, *Hero Dogs* and *My Skin Luminous*--translated by Cooper Renner. This, his first book to appear in English, promises us an fascinating, unsettling and important new voice in modern writing. In these stories the narrator speaks rationally, cleanly, carefully, with a sense of precision and progression. But the life he describes is not rational, clean precise or progressive. His focus seems to be on exploring the ins and outs of specific situations. He is not plot-driven, nor do his characterizations seem to function in the normal way -- that is, to create a sympathetic character whom the author

leads through some sort of growth process to a sort of epiphany. Any given one of his sentences, isolated from its context, might seem like an ordinary narrative sentence in a traditional work. Bellatin's contexts don't work that way: situations and thought repeat and recur in an apparently random fashion; he refuses to orchestrate climaxes and artificial excitements, even where a conventional writer would immediately do so.

From the prize-winning, internationally bestselling novelist Marcos Aguinis comes an epic love saga set against the tumultuous backdrop of the Cuban Revolution. It is a time for upheaval in Cuba: the time to build a new society. Even from her position of privilege, idealistic divorcée Carmela Vasconcelos sees the waves of uprising and is caught up in the excitement. Persuaded by her brother, Lucas, she flees her wealthy home to join Fidel Castro's rebels. In the mountainous jungle of the Sierra Maestra, Carmela meets Ignacio Deheza, a charismatic Argentinian socialist fighting on behalf of the insurrection. On the training fields of a revolution, they bond in the cause--and in a blind passion that stirs their blood and soul. As Carmela, Ignacio, and Lucas navigate increasingly dangerous political waters, their personal fates become inexorably tied with that of their country. But when the rebellion succumbs to corruption and disillusionment, they'll find their dedication to the movement tested. For Carmela and Ignacio, they'll soon discover that it's their commitment to each other--and the choices they must make to survive--that will be the greatest challenge of all.

REVIEW OF CUENTOS CHINOS ANDRES OPPENHEIMER

- What if the Nazis had won WWII? Would the world change for the better, or worse? Fahrenheit 451 by Ray Bradbury deals with a society controlled to the point where firefighters and firemen are used to start fires in the middle of the night. Animals are no longer living, but programmed machines, and thinking out of the ordinary is considered blasphemous. This is the exact type of lifestyle the Nazis would have enforced. Guy Montag, a fireman, questions these ethics after a book burning at an old woman's house goes terribly wrong. This incident inspires Guy to question his type of life and the government's thinking. As society and the fire chief catch on to Guy's unorthodox behavior, Guy finds himself a target by society and the hunt for his life begins. The setting of this book is very difficult to follow. Ray Bradbury does a poor job of showing or even telling where the story takes place, and what the date is. Because of this, you find yourself wondering throughout the piece about simple things like where Guy is and the city he lives in. However, this sketchy plot gives you the sense that the city could actually be anywhere, which seems to be the goal of Ray Bradbury. When he first reveals to you that the city in which Guy lives is called City, it makes you wonder where in fact this story takes place. You do get clues about the type of lifestyle people live, like TV's in every household that are the size of whole walls, and the mechanical pets that are in each household. When reading this book I found myself picturing where I thought Guy was. So this was an effective way of writing to me. When Ray Bradbury describes Guy's wife driving on an isolated road in a forest, running over small mechanical animals at will, you know that the area must be in an area that has a temperate climate like Europe. I believe that a major fault in the book would be the main character Guy Montag. Guy pretty much has two personalities: the one where he doesn't think for himself and the one where he does. His ideas and attitudes change quickly in the beginning and then they stay the same again for the majority of the book. However, the supporting characters were developed quite well and I especially like the fire chief. As Guy's main antagonist, the fire chief played a pivotal part in the transformation of Guy. The plot on the other hand is done quite well. The first half of the book slowly sets the tone, and introduces and develops the characters. As soon as you switch over to the second half of the book, you are just blown away. The second half deals with Guy's struggles in his quest to find the truth and flee from the hell in which he lives. It is very simple to tell when the book is in each of the action stages and when the conflicts change. The books builds

up so well to the climax that you can't wait to turn the page to see what happens next. The climax keeps you glued to the book and never gives you a chance to take a break. The theme and topic are very unique and are what keep you interested. I couldn't put down the book because I just wanted to see how a society so influenced by specific rules would turn out in the end. I recommend this book

to readers who enjoy science fiction books and suspense novels. This is one of Ray Bradbury's best pieces and I think everyone will enjoy it.

- I am an avid reader and Ray Bradbury's idea of a book burning society is amazing. I believe this is a must read for 8th graders and up. I was forced to read this book and I am happy i read it!
