The baby owls came out of their house, and they sat on the tree and waited. A big branch for Sarah, a small branch for Percy, and an old piece of ivy for Bill. When three baby owls awake one night to find their mother gone, they can't help but wonder where she is. Stunning illustrations from unique and striking perspectives capture

the owls as they worry about their mother: What is she doing? When will she be back? What scary things move all around them? Not surprisingly, a joyous flapping and dancing and bouncing greets her return, lending a celebratory tone to the ending of this comforting tale. Never has the plight of young ones who miss their mother been so simply told or so beautifully rendered.

Nutrition for a Changing World engages students like no other nutrition textbook. Real stories - about real people and real science - are integrated into every

chapter, bringing context and relevance to the core science. Infographics in the style of Scientific American magazine are like "science storyboards" that guide students step-by-step through essential processes and concepts. Coverage of timely topics such as gluten-free diets, the diabetes epidemic, and global nutrition exemplify the book's contemporary approach to nutrition science. Nutrition for Changing World is also the only product for the course to offer automatically graded diet analysis activities. AnalyzeMyDiet provides both a diet tracker and personalized, auto-graded diet analysis activities built to cover a standard 3- to 7-day

diet analysis assignment, freeing instructors from hand-grading these projects.

“An engrossing story of audacious entrepreneurship and big-industry disruption, [this] is a tale for our times.” —Charles Duhigg, author of *Smarter Faster Better*  
An investigative look into a beloved, disruptive, notorious start-up This is the remarkable behind-the-scenes story of the creation and growth of Airbnb, the online lodging platform that is now the largest provider of accommodations in the world. At first just the wacky idea of cofounders Brian Chesky, Joe Gebbia, and Nathan Blecharczyk, Airbnb has become indispensable to millions of hosts and travelers around the

world. Fortune editor Leigh Gallagher presents the first nuanced, in-depth look at the Airbnb phenomenon—the successes and controversies alike—and takes us behind the scenes as the company’s young CEO steers into increasingly uncharted waters. “A fast-paced, fun dive into one of the seminal firms of our time; through the tale of Airbnb, Leigh Gallagher shows us how the sharing economy can be a force for emotional connection—as well as for social and business disruption.” —Rana Foroohar, Financial Times columnist and CNN global economic analyst

Janis Kuby's groundbreaking introduction to immunology was the first textbook for the course actually written to be a textbook. Like no other text, it combined an experimental emphasis with extensive pedagogical features to help students grasp basic concepts. Now in a thoroughly updated new edition, Kuby Immunology remains the only undergraduate introduction to immunology written by teachers of the course. In the Kuby tradition, authors Judy Owen, Jenni Punt, and Sharon Stranford present the most current concepts in an experimental context, conveying the excitement of scientific discovery, and highlight important advances, but do so

with the focus on the big picture of the study of immune response, enhanced by unsurpassed pedagogical support for the first-time learner.

Thomas Edison's greatest invention? His own fame. At the height of his fame Thomas Alva Edison was hailed as "the Napoleon of invention" and blazed in the public imagination as a virtual demigod. Starting with the first public demonstrations of the phonograph in 1878 and extending through the development of incandescent light and the first motion picture

cameras, Edison's name became emblematic of all the wonder and promise of the emerging age of technological marvels. But as Randall Stross makes clear in this critical biography of the man who is arguably the most globally famous of all Americans, Thomas Edison's greatest invention may have been his own celebrity. Edison was certainly a technical genius, but Stross excavates the man from layers of myth-making and separates his true achievements from his almost equally colossal failures. How much credit should Edison receive for the various inventions that have popularly been attributed to him—and how many of them resulted from both the

inspiration and the perspiration of his rivals and even his own assistants? This bold reassessment of Edison's life and career answers this and many other important questions while telling the story of how he came upon his most famous inventions as a young man and spent the remainder of his long life trying to conjure similar success. We also meet his partners and competitors, presidents and entertainers, his close friend Henry Ford, the wives who competed with his work for his attention, and the children who tried to thrive in his shadow—all providing a fuller view of Edison's life and times than has ever been offered before. The Wizard of Menlo Park reveals not

only how Edison worked, but how he managed his own fame, becoming the first great celebrity of the modern age.

*Dare to Lead* Dragonfly Investment firm Y Combinator is the most sought-after home for startups in Silicon Valley. Twice a year, it funds dozens of just-founded startups and provides three months of guidance from Paul Graham, YC's impresario, and his partners, also entrepreneurs and mostly YC alumni. The list of YC-funded success stories includes Dropbox (now valued at \$5 billion) and Airbnb (\$1.3 billion). Receiving an offer from YC creates the opportunity of a lifetime -- it's like American Idol for budding entrepreneurs. Acclaimed journalist Randall Stross was granted unprecedented

access to Y Combinator's summer 2011 batch of young companies, offering a unique inside tour of the world of software startups. Most of the founders were male programmers in their mid-twenties or younger. Over the course of the summer, they scrambled to heed Graham's seemingly simple advice: make something people want. We watch the founders work round-the-clock, developing and retooling products as diverse as a Web site that can teach anyone programming, to a Wikipedia-like site for rap lyrics, to software written by a pair of attorneys who seek to "(Bmake attorneys obsolete." Founders are guided by Graham's

notoriously direct form of tough-love feedback. "(BHere, we don't fire you," he says. "(BThe market fires you. If you're sucking, I'm not going to run along behind you, saying, 'You're sucking, you're sucking, c'mon, stop sucking.'" Some teams would even abandon their initial idea midsummer and scramble to begin anew. The program culminated in "(BDemo Day," when founders pitched their startup to several hundred top angel investors and venture capitalists. A lucky few attracted capital that gave their startup a valuation of multiple millions of dollars. Others went back to the drawing board. This is the definitive story of a seismic shift that's occurred in the

business world, in which coding skill trumps employment experience, pairs of undergraduates confidently take on Goliaths, tiny startups working out of an apartment scale fast, and investors fall in love.

From an expert in adolescent psychology comes a groundbreaking, timely, and necessary guide for parents of the 2.2 million young adults in America who are struggling to find their way in the world. In Dr. Mark McConville's decades of experience as a family clinical psychologist, perhaps no problem has been more fraught than that

of young adults who fail to successfully transition from adolescence into adulthood. These kids--technically adults--just can't get it together: They can't hold a job, they struggle to develop meaningful relationships, and they often end up back in their parents' spare bedroom or on the couch. In fact, studies show that 1 in 4 Americans aged 25 to 34 neither work nor attend school, and it's a problem that spans all socioeconomic and geographic boundaries. McConville investigates the root causes of this problem: Why are modern kids "failing to launch" in ever-increasing numbers? The key, McConville has found, is that they are struggling with three critical skills that

are necessary to make the transition from childhood to adulthood--finding a sense of purpose, developing administrative responsibility, and cultivating interdependence. In *Failure to Launch*, McConville breaks these down into achievable, accessible goals and offers a practical guide for the whole family, to help parents instill those skills in their young adults--and to get their kids into the real world, ready to start their lives.

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based

on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as

finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling

author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that

millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up

and into brave leadership.

The must-read guidebook for entrepreneurs looking to get into accelerator programs and to build and scale their startups with speed. Accelerator programs have become one of the most powerful and valuable resources for entrepreneurs seeking to learn rapidly, build powerful networks, raise capital, build their startups and do this at speed and scale. In recent years, the number of accelerator programs around the world has grown at an incredible rate, propelling startups such as AirBnB, Uber, DropBox, Reddit, and others — many to billion-dollar valuations. The number

of accelerators, the differences in accelerator program offerings and the unique benefits and costs of different accelerator locations makes choosing the right accelerator a challenge. Selecting the wrong accelerator, failing to be accepted in the right one, or not fully taking advantage of all the accelerator has to offer can be costly, sometimes fatal. With the stakes so high, entrepreneurs need to understand all their options, choose carefully and do the right things to maximize their chances of success. *Startup Accelerators* is the go-to guide for any entrepreneur, providing a firsthand look into the acceptance criteria and inner workings of

different accelerator programs. Written by entrepreneurs for entrepreneurs, this indispensable resource explains what different accelerator programs offer, how to get accepted, what to do during the program, how to raise money during accelerators, what to do after the program ends, and much more. Packed with real-world case studies and advice from leading experts on startup accelerator programs, this one-stop resource provides step-by-step guidance on the entire accelerator process. Reveals how accelerators help founders navigate different challenges in the startup journey. Describes the differences in the benefits and costs of

different accelerator programs. Explains how to prepare accelerator applications. Discloses what actions to take during an accelerator to make the most of it. Depicts case studies of entrepreneurs' accelerator applications, experiences and outcomes across different accelerators. Features interviews with accelerator program managers, founders who went through accelerators, and investors in companies going through or having gone through accelerators. Includes insightful data and reflections from entrepreneurship education researchers and academics. Startup Accelerators: A Field Guide will prove to be invaluable for startup founders considering or

going through accelerators, as well as aspiring entrepreneurs, educators, and other startup accelerator stakeholders.

The bestselling classic that launched 10,000 startups and new corporate ventures - The Four Steps to the Epiphany is one of the most influential and practical business books of all time. The Four Steps to the Epiphany launched the Lean Startup approach to new ventures. It was the first book to offer that startups are not smaller versions of

large companies and that new ventures are different than existing ones. Startups search for business models while existing companies execute them. The book offers the practical and proven four-step Customer Development process for search and offers insight into what makes some startups successful and leaves others selling off their furniture. Rather than blindly execute a plan, The Four Steps helps uncover flaws in product and business plans and correct them before they become costly. Rapid iteration, customer feedback, testing your assumptions are all explained in this book. Packed with concrete examples of what to do, how to do it and

when to do it, the book will leave you with new skills to organize sales, marketing and your business for success. If your organization is starting a new venture, and you're thinking how to successfully organize sales, marketing and business development you need The Four Steps to the Epiphany. Essential reading for anyone starting something new. The Four Steps to the Epiphany was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup

Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas

as the organizing principle for startup hypotheses

- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive your startup to repeatable, scalable profits.
