REVIEW OF ADVANCED DUNGEONS DRAGONS RULEBOOK BOOK OF ARTIFACTS

- Ball lightning obviously is an extremely rare event. As in the case of other rare phenomena, the investigator is dependent on reports of casual witnesses, because systematic observing programs are not possible. The reports collected over many years include reliable as well as doubtful information. Stenhoff gives a good sample of reports, photos and descriptions. These clearly show the range of observed phenomena and the questions which remain open. The summary of sightings and the review of theories to explain the variety of observations makes the book very valuable, particularly as there is no comparable recent publication on this topic. I also appreciate the list of references (up to 1998 publications) which allows to look for details regarding reports as well as theoretical papers. All together: highly recommended.

- My two boys, 2 and 3 1/2, LOVE "No! David!". They start laughing on the first page, and are delighted all the way through. This second book just isn't funny for this age group, with the exception of just one or two pages. I think that my children, who thoroughly enjoy the naughty antics in "No! David!", and probably relate to them, just don't understand what David is up to in his "big kid in school" setting (arriving after the bell, cutting in the lunch line, having to use the rest room repeatedly, etc). If possible, borrow the book from the library and see if your child appreciates David's new situations before purchasing

the book. For an older child, it may be one to read over and over.
