"Large-scale efforts have been made since the 1990s to ensure that all children of the world go to school. But mere enrollment is not sufficient, students must become fluent in reading and calculation by the end of grade 2. Fluency is needed to process large amounts of text quickly and use the information for decisions that may ultimately reduce poverty. State-of-the-art brain imaging and cognitive psychology research can help formulate effective policies for improving the basic skills of low-income students. This book integrates research into applications that extend from preschool brain development to the memory of adult educators. In layman's terms, it provides explanations and answers to questions such as: Why do children have to read fast before they can understand what they read? How do health, nutrition, and stimulation influence brain development? Why should students learn basic skills in their maternal language? Is there such a thing as an untrained teacher? What signs in a classroom show whether students are getting a quality education? How must information be presented in class so that students can retain it and use it? What training techniques are most likely to help staff put their learning into use? This book would be useful to policymakers, donor agency staff, teacher trainers, supervisors, and inspectors, as well as university professors and students."

Globalization has created an interconnected world, but has not diminished violence and militarism. *The Economics of Killing* describes how the power of global elites, entrenched under globalization, has created a deadly cycle of violence. In this groundbreaking work, Vijay Mehta shows how attempts at peaceful national development are routinely blocked by Western powers. He centers the

2008 financial crisis in US attempts to block China's model of development. He shows how Europe and the US conspire with regional dictators to prevent countries from developing advanced industries, and how this system has fed terrorism. Mehata argues that a different world is possible, based on policies of disarmament, demilitarization, and sustainable development. This original and thought-provoking book will be of great interest to anyone concerned about the consequences of endless war fueled by the West.

REVIEW OF CATALOG 8000 4 USA DYNASERV PARKERMOTION

- The subtitle of this book is important. By "imagination" Richard Reeves means the combination of idealistic vision, dogged determination and sheer likeability that made Ronald Reagan so popular despite his obvious intellectual limitations and his capacity for mixing fact and fiction in public statements. Reeves sums up the man: He "knew how to be President" and he also understood that his most important job was to lead the nation, not just to manage the government. Reeves admits up front that he does not share Reagan's right-leaning political philosophy and tries to give him the benefit of the doubt when he can. Nonetheless, the portrait that emerges is one of a man with a limited grasp of the intricacies of world affairs and increasingly out of touch with important events that were swirling around him. He was "a man who knew what he believed" --- even when what he believed was palpably wrong. The public aura of adulation that grew up around him was sustained, says Reeves, by fiercely protective aides who told him what to say, protected him from adversaries and stage-managed his public appearances. One major theme that emerges from these pages --- and the reader may fear that it applies to many another recent President --- is the huge difference between what the public is told and the reality of their government's private actions. We read of top-level officials dishing out facts and figures that they know to be false, of covert actions undertaken and then denied, of quotes made up out of whole cloth by press secretaries. Am I the only reader nave enough to find all this discouraging? This book is devoted entirely to the eight years of Reagan's Presidency. It is thoroughly researched and engagingly written. All the big moments of Reagan's tenure are there: Iran-Contra, the Reykjavik summit with Gorbachev, Bitburg, "Star Wars," the assassination attempt of 1981. Reagan is portrayed as a man driven by a few simplistic ideas --- America as a land specially favored by God, government as the problem rather than the solution, anyone who disagreed with him as at best deluded and at worst evil. There is a colorful gallery of villains --- Alexander Haig, arrogant and power-mad; Oliver North, duplicitous and self-righteous; Donald Regan, the officious treasury secretary and (later) chief of staff; hapless conspirators like

John Poindexter and Robert MacFarlane. And yes, the strong influence exerted on Reagan by his iron-willed wife is given full play. Reagan's inability to focus on what was going on around him, according to Reeves, reached alarming proportions toward the end of his second term and kept his aides scurrying, first to help him function and then to keep his condition from becoming public. There is a rich lode of anecdotes, some of them relayed by former Reagan staffers who wrote books after leaving their jobs: Reagan falling asleep during a meeting with the Pope, his wife hurling a vulgar epithet at the press, five-year-old Chelsea Clinton writing to urge Reagan not to visit the Bitburg cemetery ("Dear Mr. President: I have seen The Sound of Music. The Nazis don't look like nice people..."). Try though he does, on balance Richard Reeves does not paint a favorable picture of Ronald Reagan. His book is not a hatchet job by any means, but it steadily undermines the aura of sainthood that admirers have created around Reagan. Reeves's very last sentence seems to sum up his own attitude by quoting a fellow journalist watching the elaborate funeral ceremonies that followed Reagan's death in 2004: "God, this is impressive --- but the man they're talking about is not the President I covered every day." --- Reviewed by Robert Finn

- Published in the 1920s, this cinematic novel was one of the first literary works of that era to revolutionise the use of the montage and collage technique as it follows a revolving door of characters as they live out their lives in New York. Modernist in the way the lives of individuals are elliptical as the reader glimpses little pastiches and move on, filling the gaps as he negotiates street corners, back alleys and high society cafes with the cast, the novel seems to present a composite picture of the bustling city rather than any one character. Success and failure is very much a concern with the disparate cast, as each one tries to find his or her place in society, whether it is as an actress, or a lawyer in search of a ground-breaking case. The one character, Stan Emery, who questions this overwhelming concern, claiming that "I'll like to meet somebody who wanted to fail. That's the only sublime thing," does not quite survive the chaos he makes out of his life, while survivors either change like a chameleon to adapt, like Ellen, who becomes Elaine and then Helena, at different stages of her life, or opt out of the city entirely, like what Jimmy Herf does. In an urban, cosmopolitan city, where anonymity is the new norm for the waves of immigrants from their rural communities, modes of social relationships also become more distant. There is a sense of spectacle when one witnesses an act of arson by a "firebug". The reader follows the camera eye of the narrative as it scans the crowds and views the whole catastrophe from a position first from a higher and more distant position, and then as one in the crowd, but never getting close enough to feel the heat.
