This is the chapter slice "Keys to Asking Questions (Part One)" from the full lesson plan "Critical Thinking". With Critical Thinking, Students will gain the ability to not only understand what they have read, but how to build upon that knowledge independently by examining such skills as independent thinking, organization, asking questions, and problem-solving. Definitions of important terms and many opportunities to practice the skills being taught make our resource user-friendly and easy to understand. In addition, the objectives used in this book are structured using Bloom's Taxonomy of Learning to ensure educational appropriateness. You will be able to teach students the basic skills they will need to become critical thinkers. What they will learn from our resource will be just the beginning of a critical thinking journey that will continue through college and into adulthood. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy.

Critical thinking—every scholar in the literature has defined it, but there is no clearly agreed upon definition. No wonder polls and surveys reveal that few college-level faculty can define critical thinking or know how to teach it. Still, critical thinking keeps appearing in accreditation standards and surveys of the skills employers seek in college graduates. The good news is that we do know that critical thinking can be taught. But the concept cries out for the simplification, translation into discipline-relevant course outcomes, tangible teaching strategies, and concrete assessment techniques that this book will provide. Like a course or a workshop, this book proposes learning outcomes for the reader—promises of what the reader will be able to do after reading it. These include:

- explain what critical thinking is in simple terms;
- convincingly explain to students why it

is important for them to learn critical thinking, and, if they tune out, what they stand to lose; • overcome the challenges that teaching critical thinking presents; • identify the type of course content to which critical thinking can be applied and, therefore, that readers can use to teach critical thinking; • integrate critical thinking into the design of a new or existing course in any discipline; • write assessable critical thinking learning outcomes that are compatible with and make sense in any discipline; • select and adapt activities and assignments that will give students no- or low-stakes practice with feedback in critical thinking using a variety of questions, tasks, and teaching methods.

REVIEW OF CRITICAL THINKING SCENARIOS AND ANSWERS

- I have not been able to disregard the fact that this brilliant biography by one of the most important poets of our age appears to have been forgotten amid the heat of commerce. But there is another kind of commerce: one in which women have an expertise. When one of us is felled by tragedy, like the huge loss of Anne Sexton, it touches each and every one of us as we learn of its happenstance. One does not have to be a poet, an artist or suicidal to get this. Our collective history as women struggling to balance our lives within a largely patriarchal society with love, home, marriage, divorce, children, career, and faith in whatever form or not - is a burden to which few will admit. Anne Sexton, however, met all of the latter head on with genius artistry and with all the passion and complexitiy any soul could bear. Indeed, as Diane Middlebrook brilliantly writes - she bore it for as long as she possibly could with more grace, style and courage than most. In fact, not only is this biography essential as a purchase, but take the time to collect (if you can...) everything Anne Sexton wrote. You will never be quite the same. And I can only guess that she would have liked that....
