Join our area today and start your journey right into the globe of literature with simple downloads of all your preferred publications like **Model Engineers Rudy Kouhoup Craftsmanship Museum!**

REVIEW OF MODEL ENGINEERS RUDY KOUHOUP CRAFTSMANSHIP MUSEUM

- I am a student at musicians Institute in LA. I wanted to learn more about MIDI and bought this book. It has old pictures and couple sections are out of date. But if your are able to tell the difference between todays computers used in Music, you'll be fine>Great explanation. Very easy discription how MIDI messages are sent, how to use them and how to put together a MIDI System>All in all a great book. Helped me a lot

- I agree with the reviewers who commented that this book is not about making journals by hand. (Especially the scant instructions on restructuring a hardbound book and the triptych.) My real reason for writing this review is to STRONGLY CAUTION all readers about the two solvent techniques and the rather blasé hazard warnings. Blender pens are extremely toxic and have been taken off the market. Xylene is a very hazardous product, as are the solvents listed, including natural solvents such as peppermint. (I had to go to the hospital because of the affects of inhaled wintergreen oil, even though I was working outside on a windy day. Don't do it!) Many of these solvents leave a scent or residue on the pages long after you've finished your project. The book is quick to "read" since it has very little information. Worse, the photographs are annoyingly without depth of field leaving foreground and background of images out of focus. That said, and the reason I gave it a 2 rating, the journals the artists are keeping are very inspirational and artful. (They rate a 5) Jason Thompson should be commended for sharing these works with other artists -- but not for his descriptions or techniques!
