## **REVIEW OF LAB 1 THE SKELETON**

- This is the first book in the Esther Diamond series but it was published after several of the sequels by DAW since the original publisher had some issues. This made it interesting to read since I have read the other books which have references to what happens in this story, but that did not diminish the fun I had reading it. Esther is a struggling actress in New York City working in a magic act/play as an understudy when the starlet disappears -literally. Soon she finds out other magic acts have had disappearances and the fun ensues. We meet her on and off love interest Detective Lopez - who doesn't believe much of what she says about what is going on; Dr. Max Zadok - the 300 year-old sorcerer who is fighting Evil in NYC, and some of the other cast of characters that populate the series. Resnick has a winner in this series. It is quirky, fun, action filled and well written. The dialogue is snappy with a lot of give and take, the settings well-described and the plot interesting without being convoluted. Urban fantasy is sometimes dark, often heavily romantic, but in this series those elements are in the background and I think it makes for a more enjoyable story. I will read every book that comes out in this series.

- Great- this book arrived on time and was in the condition that was stated. I am very happy with this book.
