This volume begins with excerpts from Aquinas' commentary on *De Anima*, excerpts that proceed from a general consideration of soul as common to all living things to a consideration of the animal soul and, finally, to what is peculiar to the human soul. These are followed by the *Treatise on Man*, Aquinas' most famous discussion of human nature, but one whose organization is dictated by theological concerns and whose philosophical importance is thus best appreciated when seen as presented here: within the historical philosophical framework of which it constitutes a development. Aquinas' discussions of the will and the passions follow, providing fruitful points of comparison with other philosophers.

Drawn from the translations and editorial aids of Irwin and Fine's *Aristotle, Selections*, this anthology will be most useful to instructors who must try to do justice to Aristotle in a semester-long ancient philosophy survey, but it is also appropriate for a variety of introductory-level courses. This book provides accurate, readable, and integrated translations that allow the reader to follow Aristotle's use of crucial technical terms and to grasp the details of his argument. Included are adaptations of the glossary and notes that helped make its parent volume a singularly useful aid to the study of Aristotle.

Inwood and Gerson maintain the standard of consistency and accuracy that distinguished their translations in the first edition, while regrouping some material into larger, more thematically connected passages. This edition is further enhanced by a new, more spacious page design.

The Continuing Quest AristotleIntroductory Readings

Syrianus, originally from Alexandria, moved to Athens and became the head of the Academy there after the death of Plutarch of Athens. This discussion of Aristotle's *Metaphysics* 3-4 shows how metaphysics, as a philosophical science, was conceived by the Neoplatonic philosopher of Late Antiquity. The questions raised by Aristotle in *Metaphysics* 3 regarding the scope of metaphysics are answered by Syrianus, who also criticises the alternative answers explored by Aristotle. In presenting *Metaphysics* 4, Syrianus explains in what sense metaphysics deals with 'being as being' and how this includes the essential attributes of being (unity/multiplicity, sameness/difference, etc.), showing also that it comes within the scope of metaphysics to deal with the primary axioms of scientific thought, in particular the Principle of Non-Contradiction, for which Syrianus provides arguments additional to those developed by Aristotle. Syrianus thus reveals how Aristotelian metaphysics was formalized and transformed by a philosophy which found its deepest roots in Pythagoras and Plato.

Aristotle: Introductory Readings Indiana University Press

In this groundbreaking work, C. D. C. Reeve uses a fundamental problem--the Primacy Dilemma--to explore Aristotle's metaphysics, epistemology, dialectic, philosophy of mind, and theology in a new way. At a time when Aristotle is most often studied piecemeal, Reeve attempts to see him both in detail and as a whole, so that it is from detailed analysis of hundreds of particular passages, drawn from dozens of Aristotelian treatises, and translated in full that his overall picture of Aristotle emerges. Primarily a book for philosophers and advanced students with an interest in the fundamental problems with which Aristotle is grappling, Substantial Knowledge's clear, non-technical and engaging style will appeal to any reader eager to explore Aristotle's difficult but extraordinarily rewarding thought.

Alexander of Aphrodisias's commentary (about AD 200) is the earliest extant commentary on Aristotle's Metaphysics and the most important indirect witness to the Metaphysics text. In this study, Mirjam Kotwick demonstrates how to reconstruct from Alexander's commentary the Metaphysics text Alexander used and how to make use of this ancient version of the Metaphysics for improving the text of our direct manuscript tradition. Moreover, Kotwick investigates how Alexander's commentary may have influenced the transmission of the Metaphysics at

REVIEW OF ARISTOTLE INTRODUCTORY READINGS

- This is a story of a British medical doctor who went to China years before the communists took over China, so had experience both with what China was like before 1949 and for two years after. The final chapter has a couple of stories from later when he had a clinic in Hong Kong. The story starts with Dr. Rees on his way to a village run by the "Jesus Family", a Christian group that was independent of any mission effort from other countries. This was after the communists had taken over, and Dr. Rees was exiled to a small, rural village. What follows are a series of observations of life in the Jesus Family. This included several flashbacks to what life was like before the communists took over,

as a theme to show how certain practices were developed among the members of the group. Some of the flashbacks give information as to how Chinese society in his area was set up both before and after the communist revolution. One striking picture is when communist forces came to the village to announce their victory: the officer in charge read a proclamation, only to have a man in the simple garb of a coolie correct the language of the proclamation. That coolie was a graduate of Oxford. The communist officer then asked to see the headman of the village. Background: the headmen of the villages mostly oppressed their villages, so the communists found that by executing him, the farmers then happily supported the communists. The coolies around the officer stalled, as they saw their headman approaching. Another coolie came by pushing a wheelbarrow load of manure to the field, whereupon he was introduced as the village head. The amazed communist asked why he as the headman of the village was doing the lowest of jobs, only to get the answer that the Bible teaches that if one wants to be the leader, he must be the servant of all. That meant the the headman got the privilege of doing the least liked jobs in the village. This is just one of many examples of how these people lived the teachings of the Bible. The Jesus Family was a stark contrast, both to the pre-communist China, and to the communist rule. Dr. Rees observed that the reason the pre-communist China was so backward was not because Chinese people are lazy or mentally deficient, rather it was because of their morality. Europe and the U.S. owed their superiority to China and other lesser developed countries to the teachings of the Bible and to no other source. The same thing worked in China, where the Jesus Family were advanced over their neighbors because of how they put Biblical teachings into practice. I was amazed and humbled by how these people lived Christianity. This review would have to include the whole book to give an adequate picture, but that is not practical. I highly recommend reading the book.

- The best study of the "social & moral" teachings of Jesus is this version of the Jefferson Bible. It has red-letter text for the quotations of Jesus, and cites the NT passages from which they are taken. It is in the King James version, so you may want to use [...] for the modern English translations of the Jesus quotations, which will give the poetry of the KJV new life. Taking out all the Theology & Eschatology was a brilliant innovation by Thomas Jefferson.
