rewarding addition to your shelf. So, if you're trying to find an exciting read, Mcgraw Hill Ryerson Mathematics 11 Lagout is certainly worth considering.

## **REVIEW OF MCGRAW HILL RYERSON MATHEMATICS 11 LAGOUT**

- Gillespie's *Manufacturing Knowledge* illuminates an important chapter in the history of early 20th-century theory-driven empirical social science. This concerns the Hawthorne experiments of the 1920s and 1930s. They influenced industrial psychology, sociology and political science. Except for those already converted to the extreme version of

Gillespie's central claim (he waffles), the author's style may drive away some readers unwilling to make the effort to read the book. *Manufacturing Knowledge* neatly and valuably reveals the public relations involved in convincing academics and corporate leaders of a single interpretation of the Hawthorne experiments. That achievement and Gillespie's exposure of political power in the research networks underlying earlier and later Hawthorne experiments nicely show how corporate and academic biases affected the research of the Hawthorne researchers. Gillespie's tediousness in repeatedly claiming that all knowledge is

imposed makes some chapters very dry reading. (Indeed, he seems unaware of his apparent ambivalence, backing off the extreme version of his claim more than once.) Although chronology is important in his narrative, Gillespie will sometimes leave the reader unsure about the point in time to which his examples and claims refer. And more than once, Gillespie leaves crucial findings from his extensive archival research half-digested. That's unfortunate. Gillespie assumes a lot: The more familiar one is with U.S. social history during 1900-1940, the more one will benefit from this unevenly written book. References to Japanese workplaces have

potential but come across as an afterthought - attached but not deeply integrated into the rest of the book. More than one reading will be necessary. It's worth the effort.

- I love the Aubrey novels. I love a good parody. I love an atrocious pun. I love clever and obscure wit. I hate...well no...I dislike this book. It is dull, clunky, disjointed, repetitive and unimaginative. I sense that Mrs. Wenger was unsure if she was writing a parody, or trying to write a story for inclusion in the series. The author alas demonstrates how so many bright people are also seen to be dreadful bores. I am halfway through the book and I fear I will do what I almost never

do...put a book away for any book. Don't  
unfinished. No greater waste your time or  
disrespect can I show money.
