REVIEW OF FUNDAMENTALS OF THERMODYNAMICS MORAN 7TH SOLUTION MANUAL

- "How to Lie with Statistics" should be required reading before allowing anyone in today's world to call themselves an adult. And, yes, there should be strict testing for understanding this book before anyone is allowed to leave public (or private) schools and take part in real life. This book shows some of the ways media such as newspapers, TV, internet, etc. deceive you. Besides the media (especially advertisers); politicians, lawyers, and all sorts of other folks behave like confidence men and try to get your money, your trust, your vote, and your beliefs. IMMUNIZE YOURSELF! Read this book. Buy this book. Study this book. Memorize this book! This book will help you avoid the crooked people.

- You can make a significant, positive difference! That's the message of this book. It is filled with quotable insights from a wide variety of sources. "Great success demands great sacrifice" we're told on page 16 and many of these contributors have paid their fair share. This book inspires one to give. We're reminded on page 21 that "Ultimately we are remembered for what we give, not for what we take." In terms of cultivating the relationships in our lives, we're told "The quality of your life is determined by the quality of the people in your life." There are so many good quotes throughout this whole book that it is a delight to go through and try to select a few to give a flavor of what one will find. Consider the quote on page 32, "Everybody works hard when they feel like it, but only the best do it when they don't feel like it." In summary I'd just say "buy it and read it." It's well worth the money and effort.
