Some secrets are dangerous. This Secret is deadly. For Secret McQueen, her life feels like the punch line for a terrible joke. Abandoned at birth by her werewolf mother, hired as a teen by the vampire council of New York City to kill rogues, Secret is a part of both worlds, but belongs to neither. At twenty-two, she has carved out as close to a normal life as a bounty hunter can. When an enemy from her past returns with her death on his mind, she is forced to call on every ounce of her mixed heritage to save herself-and everyone else in the city she calls home. As

if the fate of the world wasn't enough to deal with, there's Lucas Rain, King of the East Coast werewolves, who seems to believe he and Secret are fated to be together. Too bad Secret also feels a connection with Desmond, Lucas's second-in-command... Warning: This book contains a sarcastic, kick-ass bounty hunter; a metaphysical love triangle with two sexy werewolves; a demanding vampire council; and a spicy seasoning of sex and violence.

REVIEW OF THE PHANTOM X MURDEROUS MATHS

- Children of the Mind is an excellent read. The plotline is intense, the interpersonal-relationships are complex, and the characters are realistic. Card answers all the questions he brought up in the first three books (which, in my opinion, were better). My only complaint is that some of Card's spiritualism can get

pretty bizarre at times. The bit about auia's struck me as unrealistic. But as a whole, Children of the Mind is definately a worthy choice.

- Orson Scott Card is my hero. How he can continue his Ender story to completely new worlds and not lose the reader is an amazing feat. I am moving on to the parallel stories of Ender's Shadow. I will be heart broken when that series is done. No really. I will be heart broken...
