This practical guide is a great solution to address the key problem how to implement ITSM and ISO 20000 when initial training has been completed. It supports the basic approaches to the fundamental processes - small to medium sized companies will find the

concise, practical guidance easy to follow and implement. It avoids the complex, enterprise-wide issues which though valid are not a major issues for those organizations whose IT processes form only a small part of the service offering to customers. Each chapter has the following structure:

- Improvement activities
- Process inputs and outputs
- Processes related to Tools and techniques
- Key Performance Indicators
- Critical Success Factors
- Improvement roles
- Benefits of effective Implementation
- challenges and considerations
- Typical assets and artifacts of an Improvement program

This compact and concise study provides a clear insight into the concepts of Core Banking Solution (CBS)—a set of software components that offer today's banking market a robust operational customer database and customer administration. It attempts to make core banking solution familiar to the professionals and regulatory authorities, who are responsible for the control and security of banks, and shows that by using CBS, banking services can be made more customer friendly. This well-organized text, divided into two parts and five sections, begins (Part I) with the need for core banking

solution technology in banking system, its implementation and practice. It then goes on to a detailed discussion on various technology implications of ATM, Internet banking, cash management system and so on. Part I concludes with Business Continuity Planning (BCP) and Disaster Recovery Planning (DCP). Part II focuses on components of audit approach of a bank where the core banking solution has been in operation. Besides, usage of audit tools and study of audit logs have been discussed. The Second Edition includes new sections on outsourcing of ATM operations, printing of ATM card, printing of Pin Mailers, mobile banking, Point of Sale (POS), financial inclusion, vulnerability assessment, penetration testing and so on. Besides, many topics have been discussed extensively and updated to make the book more comprehensive and complete. Key Features

- Suggested checklists for performing audits are included.
- An exclusive chapter is devoted to Case Studies based on fraudulent activities in banks due to lack of security and controls.
- Useful Web references have been provided.
- Contains relevant standards of international body ISACA, USA. This book would be useful for Chartered Accountants who are Auditors of various banks. It would help the External System Auditors and

the Auditors who perform concurrent system audit of banks and also the Officers of the Department of Banking Supervision of the Reserve Bank of India and others who have the responsibilities of regulating the security and controls in the banks. In addition, it would be extremely useful to the bankers who have Information Technology as one of the subjects for the CAIB examination.

In his first complete text on the ADKAR model, Jeff Hiatt explains the origin of the model and explores what drives each building block of ADKAR. Learn how to build awareness, create desire, develop knowledge, foster ability and reinforce changes in your organization. The ADKAR Model is changing how we think about managing the

people side of change, and provides a powerful foundation to help you succeed at change. After more than 14 years of research with corporate change, the ADKAR model has emerged as a holistic approach that brings together the collection of change management work into a simple, results oriented model. This model ties together all aspects of change management including readiness assessments, sponsorship, communications, coaching, training and resistance management. All of these activities are placed into a framework that is oriented on the required phases for realizing change with individuals and the organization. The ADKAR perspective can help you develop a new lens through which to observe and influence change. You may be working for change in your public school system or in a small city council. You may be sponsoring change in your department at work. You may be observing large changes that are being attempted at the highest levels of government or you may be leading an enterprise-wide change initiative. The perspective enabled by the ADKAR model allows you to view change in a new way. You can begin to see the barrier points and understand the levers that can move your changes forward. ADKAR allows you to

understand why some changes succeed while others fail. Most importantly, ADKAR can help your changes be a success. Based on research with more than 900 companies from 59 countries, ADKAR is a simple and holistic way to manage change.

IT Governance is finally getting the Board's and top management's attention. The value that IT needs to return and the associated risks that need to be managed, have become so important in many industries that enterprise survival depends on it. Information integrity is a significant part of the IT Governance challenge. Among other things, this conference will explore how Information Integrity contributes to the overall control and governance frameworks that enterprises need to put in place for IT to

deliver business value and for corporate officers to be comfortable about the IT risks the enterprise faces. The goals for this international working conference are to find answers to the following questions: • what precisely do business managers need in order to have confidence in the integrity of their information systems and their data; • what is the status quo of research and development in this area; • where are the gaps between business needs on the one hand and research I development on the other; what needs to be done to bridge these gaps. The contributions have been divided in the following sections: • Refereed papers.

These are papers that have been selected through a blind refereeing process by an international programme committee. • Invited papers. Well known experts present practice and research papers upon invitation by the programme committee. • Tutorial. Two papers describe the background, status quo and future development of CobiT as well as a case of an implementation of Co biT.
